Business Requirements Document (BRD)

Inventory Management System

1. Document Information

Attribute	Detail
Document ID	BRD-IMS-001
Document Title	Business Requirements Document — Inventory Management System
Version	1.0
Status	For Stakeholder Review
Document Owner	Senior Business Analyst
Prepared For	Executive leadership, project sponsor, product owner, operations, commercial, finance, and governance stakeholders
Date	July 3, 2026
Classification	Internal — Business Confidential
Scope	Business requirements only — no technical design, architecture, APIs, database schema, or implementation details

Source Documents

This BRD consolidates deliverables from the following completed project phases:

Phase	Key Artifacts
Business Discovery	Business Vision, Project Scope, SMART Business Objectives, Stakeholder Analysis, Business Assumptions, Business Constraints, Success Metrics
Domain Analysis	Business Process Analysis (32 processes), Business Actor Analysis (27 actors), Business Pain Points (28), Business Workflows, Business Events, Business Glossary
Domain Knowledge	Core Concepts, Industry Business Rules (32), Best Practices, Industry Standards, Scenarios, Challenges, Advanced Glossary
Functional Requirements	90 functional requirements (FR-001–FR-090), 30 features, 90 user stories, MoSCoW prioritization
Non-Functional Requirements	Performance, Scalability, Availability, Security, Logging, Monitoring, Backup/DR, Compliance (204 NFRs)
User Roles & Permissions	19 business user roles, RBAC matrix, 100 system permissions, 20 separation-of-duties rules

Document Purpose

This document defines **what** the Inventory Management System must achieve from a business perspective. It serves as the authoritative reference for stakeholder alignment, delivery planning, acceptance criteria, and change control. All requirements trace to documented business problems, objectives, and processes.

Intended Audience

Audience	Primary Sections of Interest
CEO, COO, CFO, Board	Executive Summary, Business Objectives, Scope, Success Metrics, Risks
Project Sponsor, Product Owner	Full document; Scope, Assumptions, Constraints
Operations, Warehouse, Purchasing	Business Processes, Functional Requirements, User Roles
Sales, Customer Service, Marketing	Actors, Functional Requirements (visibility, fulfillment)
Finance, Internal Audit	Business Rules, Governance, NFRs (compliance, audit)
Business Analyst, QA	Full document for traceability and acceptance testing

---

2. Revision History

Version	Date	Author	Description	Approver
0.1	June 15, 2026	Senior Business Analyst	Initial draft from Business Discovery phase	—
0.5	June 28, 2026	Senior Business Analyst	Integrated Domain Analysis and Domain Knowledge	—
0.8	July 1, 2026	Senior Business Analyst	Added Functional and Non-Functional Requirements; User Roles & Permissions	—
1.0	**July 3, 2026**	**Senior Business Analyst**	**Complete BRD for stakeholder review**	**Pending**

Approval Record

Role	Name	Signature	Date

3. Executive Summary

We are investing in an Inventory Management System because our growth has outpaced our ability to control one of our most critical business assets. As a mid-sized distribution and retail organization serving B2B and B2C customers across multiple locations, inventory is among our largest balance-sheet assets and highest sources of operational risk.

Today, decision-makers cannot confidently answer basic questions: *What do we have? Where is it? What is committed to orders? What is available to sell?* This uncertainty drives stockouts, excess inventory, fulfillment failures, manual reconciliation, and weakened customer trust.

The business need is not simply to track products. The need is to establish a single, trusted source of inventory truth that supports daily operations, management oversight, and strategic planning — connecting procurement, warehousing, sales, finance, and customer service around one shared understanding of stock.

Strategic Intent

Horizon	Intent
Short-term (0–18 months)	Establish control, visibility, and consistency in core inventory operations
Long-term (3–5 years)	Become a market leader in operational excellence, product availability, and dependable fulfillment

What This Initiative Will Deliver

- One authoritative inventory view across primary locations
- Standardized recording of all inventory movements
- Reliable order fulfillment supported by accurate availability data
- Proactive replenishment alerts and network balancing capability
- Complete audit trail and role-based accountability
- Management dashboards and KPI reporting aligned to business objectives

Investment Rationale

The value expected is measured in revenue protected, capital freed, costs reduced, customers retained, and growth enabled — not operational convenience alone. This BRD defines **90 functional requirements**, **204 non-functional requirements**, **24 SMART business objectives**, and **28 success KPIs** to govern delivery and measure outcomes within an **18-month business vision horizon**.

---

4. Business Background

Company Context

We are a mid-sized distribution and retail operations company serving B2B and B2C customers across multiple locations. Our business model depends on holding the right products in the right quantities, moving goods efficiently from suppliers to warehouses to customers, and maintaining trust through reliable fulfillment.

Over the past several years, we have grown through expanded product lines, new sales channels, and geographic reach. Revenue has increased, but operational complexity has grown faster than our ability to manage it.

Inventory as a Strategic Capability

Our leadership team recognizes that inventory is not merely a warehouse function — it is a strategic lever affecting:

- Cash flow and working capital efficiency
- Customer satisfaction and retention
- Supplier relationships and replenishment discipline
- Gross margin (shrinkage, write-offs, emergency procurement)
- Operational resilience and scalability

To support the next phase of growth, we must treat inventory visibility and control as a core business capability, not a back-office afterthought.

Current State Summary

Dimension	Current State
Visibility	Fragmented across locations, spreadsheets, and tribal knowledge
Accuracy	Estimated ~78% inventory record accuracy; chronic physical vs. recorded discrepancies
Fulfillment	Estimated 84% order fill rate; slow, opaque order-to-ship processes
Replenishment	Reactive, gut-feel purchasing; delayed response to low-stock conditions
Governance	No mature centralized inventory management function; weak audit trail (~40% completeness)
Adoption	Parallel manual tracking tools (spreadsheets, paper logs) at most locations

Phased Business Vision Alignment

Phase	Period	Focus
Phase 1: Stabilize and Centralize	Months 0–6	Single authoritative view; standardized movement recording; core fulfillment support
Phase 2: Improve Operational Performance	Months 6–12	Reduced stockouts; faster fulfillment; replenishment discipline; network balancing
Phase 3: Enable Smarter Decisions	Months 12–18	KPI-driven management; financial alignment; promotional readiness; growth confidence

---

5. Business Problem Statement

Inventory sits at the center of our operating model. Every major business outcome — revenue, margin, customer retention, working capital efficiency, and operational resilience — is directly influenced by how well we manage stock. Without a dedicated system to govern inventory as a business asset, we continue to experience the following problems:

Critical Problems

1. **Lack of real-time visibility** — Decision-makers cannot determine on-hand, reserved, and available stock without manual checks and warehouse calls.
2. **Stock imbalances across locations** — Some locations stockout while others hold excess; emergency transfers and lost sales result.
3. **Inaccurate inventory records** — Physical stock frequently does not match recorded quantities; teams spend significant time reconciling data.
4. **Sales commits without confirmed availability** — Orders are promised without verifying available-to-promise stock; cancellations and customer embarrassment follow.
5. **Finance and operations misalignment** — Operational inventory records do not match general ledger postings (~8% valuation variance).

High-Impact Problems

6. **Slow and opaque order fulfillment** — Orders delayed or partially fulfilled because inventory status is unclear at processing.
7. **Reactive replenishment** — Purchasing decisions based on gut feel rather than reliable trends and alerts.
8. **Fragmented records and parallel manual tracking** — Spreadsheets, whiteboards, and paper logs undermine a single source of truth.
9. **Inconsistent processes across locations** — Location-to-location variation prevents network-wide comparison and control.
10. **No formal inventory management accountability** — Overlapping responsibilities between warehouse, purchasing, and finance.
11. **Weak shrinkage and loss accountability** — Adjustments without reason codes; shrinkage root causes untraceable.
12. **Incomplete audit trail** — Most adjustments and transfers lack user identity, timestamp, and documented reason.

Consequences of Inaction

Without intervention, we will continue to:

- Lose sales due to preventable stockouts
- Trap capital in slow-moving or obsolete stock
- Increase operating cost through rework, expediting, and manual reconciliation
- Damage customer trust through inconsistent fulfillment
- Limit ability to expand into new markets or channels with confidence

This initiative is a business imperative, not an IT upgrade project.

---

6. Business Vision

Long-Term Vision (3–5 Years)

Our long-term vision is to become a market leader known for operational excellence, product availability, and dependable fulfillment — enabled by world-class inventory discipline.

Aspiration	Description
Full inventory confidence	Leadership and frontline teams trust inventory data for fast, accurate decisions without manual verification
Optimized working capital	Inventory investment aligned with demand; reduced excess while improving service levels
Superior customer experience	Accurate availability, reliable delivery commitments, fewer cancellations and backorders
Scale without proportional complexity	New warehouses, categories, and channels added without breaking operational control
Strong supplier relationships	Predictable, collaborative, data-informed replenishment
Culture of accountability	Every movement of goods understood, measured, and tied to business performance

Ultimately, inventory management will be viewed not as a cost center, but as a strategic capability that protects revenue, improves margins, and differentiates us in the market.

Short-Term Vision (12–18 Months)

In the first 12 to 18 months, our short-term vision is to establish **credible control** — not perfection, but measurable predictability, accountability, and efficiency within the first year of adoption.

The short-term goal is **credible control**: the business should feel measurably more predictable, accountable, and efficient. Operations teams view accurate stock status without manual spreadsheets. Management accesses a single dashboard for inventory health. Physical count variances are identified and resolved through a defined process.

---

7. Business Objectives

Twenty-four SMART business objectives define measurable outcomes the Inventory Management System must achieve. Objectives are prioritized P1 (Critical), P2 (High), or P3 (Medium).

P1 — Critical Objectives (Must achieve in first 6 months)

ID	Objective	Target	Deadline
BO-01	Single trusted inventory view — ≥95% stock inquiries resolved via system alone	Trust score ≥4.0/5.0	Month 6
BO-02	Inventory record accuracy ≥95% across primary locations	Sustained 2 quarters	Month 12
BO-03	100% standardized movement recording at all primary locations	≥98% capture rate	Month 3 per location
BO-16	Sales self-service availability — 90% inquiries without warehouse escalation	≤3 min resolution	Month 6
BO-19	100% audit trail coverage for adjustments, transfers, count variances	Full metadata	Month 6

ID	Objective	Target	Deadline
BO-21	≥90% active user adoption across target roles	Weekly activity	Month 3 per location
BO-22	Retire all parallel manual tracking tools at primary locations	Zero parallel tools	Month 6 per location

P2 — High Objectives (Operational and customer performance through month 12)

ID	Objective	Target	Deadline
BO-04	Reduce manual reconciliation hours by 60%	vs. baseline	Month 9
BO-05	Order fill rate ≥92%	First-shipment full fill	Month 12
BO-06	Reduce fulfillment cycle time by 30%	vs. baseline	Month 12
BO-07	Reduce priority SKU stockouts by 50%	A-class products	Month 12
BO-08	Reduce stock-related cancellations by 40%	≤2% of orders	Month 12
BO-11	Reduce write-offs and shrinkage by 25%	100% reason code compliance	Month 18
BO-12	Reduce emergency procurement spend by 30%	≤5% of PO volume	Month 12
BO-13	90% replenishment within 2 business days of alert	A-class SKUs	Month 12
BO-14	Reduce cross-location imbalance events by 40%	Network-wide	Month 12
BO-15	On-time delivery rate ≥90%	Committed dates	Month 12
BO-17	Reduce CS handle time on stock inquiries by 40%	≥75% first-contact resolution	Month 9

P3 — Medium Objectives (Financial optimization and strategic maturity by month 18)

ID	Objective	Target	Deadline
BO-09	Reduce excess inventory value by 20%	Without increasing stockouts	Month 18
BO-10	Improve inventory turnover by 15%	vs. baseline	Month 18
BO-18	Inventory valuation variance ≤2% vs. GL	Month-end close	Month 12
BO-20	Month-end inventory close ≤3 business days	Sustained 3 months	Month 12
BO-23	Management growth confidence score ≥4.0/5.0	Leadership survey	Month 18
BO-24	95% promotional launch readiness	7 days prior confirmation	Month 12

Objective-to-Vision Alignment

Vision Theme	Supporting Objectives
Single source of truth	BO-01, BO-03, BO-22
Reduce stockouts and overstock	BO-07, BO-09, BO-12, BO-14
Improve fulfillment reliability	BO-05, BO-06, BO-08, BO-15
Strengthen accountability	BO-11, BO-19

Vision Theme	Supporting Objectives
Enable smarter decisions	BO-10, BO-13, BO-18, BO-20
Customer satisfaction	BO-15, BO-16, BO-17
Scale with confidence	BO-21, BO-23, BO-24

---

8. Project Scope

8.1 In Scope

The Inventory Management System will serve as the company's single source of truth for stock across locations. The product scope focuses on establishing inventory control, visibility, and operational consistency first.

Product & Catalog Management

- Product master records (SKU, name, description, unit of measure, category)
- Product status management (active, inactive, discontinued)
- Basic product attributes for inventory tracking (reorder level, minimum stock threshold)
- Barcode or product identifier support for operational lookup

Location & Warehouse Management

- Multiple inventory locations (warehouses, stores, distribution points)
- Location hierarchy and stock assignment by location
- Location-level stock visibility

Inventory Visibility & Status

- Real-time on-hand quantity by product and location
- Available-to-promise (ATP) visibility
- Committed/reserved stock visibility tied to orders
- Stock status indicators (in stock, low stock, out of stock)
- Search and filter by product, location, category, and status

Inventory Movements & Transactions

- Goods receipt (inbound from suppliers or returns)
- Stock transfers between locations
- Stock adjustments (corrections, damage, shrinkage, write-offs)
- Outbound allocation and deduction linked to order fulfillment
- Full transaction history with user, timestamp, and reason codes

Order Fulfillment Support

- Order line reservation against available inventory

- Pick, pack, and ship workflow support
- Partial fulfillment handling
- Order status visibility for operations and customer service

Stock Counting & Reconciliation

- Cycle count and full physical count workflows
- Variance identification between system and physical counts
- Approval workflow for count adjustments
- Count scheduling by location or product category

Replenishment & Purchasing Support

- Low-stock alerts and reorder notifications
- Purchase request or replenishment suggestions based on thresholds
- Visibility into inbound expected stock (open purchase orders at summary level)
- Basic replenishment reporting

User Roles & Access Control

- Role-based access for warehouse staff, operations managers, purchasing, sales support, and administrators
- Permission boundaries by location and function (view, transact, approve, configure)
- User activity logging for accountability

Reporting & Dashboards

- Inventory summary dashboards
- Stock movement reports
- Stockout and overstock reports
- Inventory accuracy and variance reports
- Location performance snapshots

Notifications & Alerts

- Low-stock and out-of-stock alerts
- Pending approval notifications
- Transfer and fulfillment exception alerts

Audit & Traceability

- Complete audit trail of inventory changes
- Movement history by product, location, user, and date range
- Reason codes for adjustments and exceptions

8.2 Out of Scope

The following capabilities are explicitly excluded from this initiative:

Category	Excluded Capabilities
Financial & Accounting	General ledger, AP/AR, invoicing, tax, cost accounting, financial close, corporate budgeting
Full ERP	HR, payroll, manufacturing, MRP, fixed assets, enterprise procurement lifecycle
Sales & CRM	Lead management, pipeline, customer accounts beyond fulfillment, pricing, promotions, e-commerce storefront
Advanced Supply Chain	Transportation management, 3PL portals, VMI, customs/trade documentation, warehouse automation hardware
Manufacturing	BOM, work orders, production scheduling, MRP for in-house manufacturing
Advanced Analytics (Initial Release)	AI demand forecasting, predictive stockout modeling, ML replenishment optimization
External Integrations (Initial Release)	Marketplace integrations, POS hardware, supplier EDI, BI platform embedding
Regulatory Compliance Modules	Pharmaceutical serialization, food safety lot traceability, hazmat compliance

Note: Basic product identifiers and movement history may support future compliance needs; dedicated regulatory modules are out of scope.

8.3 MVP Scope (Phase 1 — Months 0–6)

MVP Goal: Enable the business to answer — with confidence — what stock exists, where it is, and what is available for fulfillment.

Area	MVP Capability
Products	Create and maintain core product records; active/inactive status
Locations	Configure primary warehouses and stores; assign stock to locations
Inventory View	On-hand, reserved, and available quantity by product and location
Receiving	Record inbound stock against purchase or ad-hoc receipts
Transfers	Move stock between locations with transaction history
Adjustments	Correct stock with mandatory reason codes and user attribution
Order Fulfillment	Reserve and deduct inventory; support partial fulfillment
Stock Counts	Perform cycle counts; record variances; approve adjustments
Alerts	Low-stock and out-of-stock notifications for priority products
Users & Roles	Basic roles: warehouse operator, supervisor, administrator
Reporting	Inventory summary, movement history, stock variance reports
Audit Trail	Log all inventory transactions with user and timestamp

8.4 Future Enhancements (Post-MVP)

Release	Capabilities
Phase 2 (Months 6–12)	Advanced replenishment workflows, ABC classification, batch/lot tracking, bin-level management, pick list optimization, transfer approval workflows, exception management, expanded role model
Phase 3 (Months 12–18)	Inventory performance KPIs, demand trend reporting, replenishment recommendations, aging/obsolescence reports, financial inventory alignment, custom dashboards
Long-term (18+ months)	Multi-channel sync, supplier portal, returns management, kits/bundles, multi-currency, partner system integration, mobile warehouse operations
Strategic (3–5 years)	Demand forecasting, automated replenishment, network optimization, supplier performance analytics

Scope Decision Principles

1. **Accuracy before intelligence** — Trustworthy stock data precedes forecasting and automation
2. **Visibility before optimization** — Teams must see problems clearly before optimizing them
3. **Core operations before edge cases** — Standard receive, move, count, and fulfill flows come first
4. **Adoption before expansion** — New locations and integrations follow proven usage at primary sites
5. **Business value over feature volume** — Every in-scope feature maps to a defined business problem

---

9. Stakeholders

Twenty-nine stakeholder profiles were identified across internal, external, and oversight groups.

Stakeholder Summary

Category	Count	Key Groups
Internal — Executive & Governance	4	CEO, COO, CFO, Internal Auditor
Internal — Operations & Warehouse	6	Operations Director, Warehouse Manager, Receiving Clerk, Picker/Packer, Inventory Controller, Regional/Store Manager
Internal — Commercial	4	Sales Manager, Sales Rep, Customer Service, Marketing Manager
Internal — Supply & Finance	3	Purchasing Manager, Buyer, Finance Manager
Internal — Technology & Project	4	Project Sponsor, Product Owner, Business Analyst, System Administrator
External — Supply Chain	3	Supplier, Carrier, Freight Forwarder
External — Customers	2	B2B Customer, B2C Customer
External — Oversight & Partners	3	External Auditor, Regulatory Authority, Sales Channel Partner

Stakeholder Influence Matrix

Manage Closely (High Influence, High Interest): CEO, COO, Project Sponsor, Operations Director, Product Owner, Warehouse Manager, Purchasing Manager

Keep Satisfied (High Influence): CFO, External Auditor, Regulatory Authority

Keep Informed (High Interest): Sales Manager, Sales Rep, Customer Service, Marketing Manager, Regional Manager, Finance Accountant, Inventory Controller, Receiving Clerk, Picker/Packer, Buyer, B2B Customer

Monitor (Lower Priority): B2C Customer, Freight Forwarder, Sales Channel Partner

Primary Daily System Users

Receiving Clerk, Picker/Packer, Warehouse Manager, Inventory Controller, Buyer, Customer Service Representative

Primary Decision-Makers (Reports & Dashboards)

CEO, COO, CFO, Operations Director, Purchasing Manager, Sales Manager

Key Stakeholder Dependencies

Dependency	From	To
Stock availability for sales	Operations / Warehouse	Sales / Customer Service
Replenishment timing	Inventory Controller	Purchasing
Inbound processing	Supplier	Receiving Clerk
Financial reconciliation	IMS records	Finance
Fulfillment execution	Picker/Packer	Customer Service / Customer
Product data quality	Inventory Controller	All operational users
Campaign readiness	Purchasing / Warehouse	Marketing

---

10. Business Processes

Thirty-two business processes govern inventory management across nine domains. Each process supports requirements traceability via BP-xx identifiers.

Process Index

ID	Process Name	Domain	Priority
BP-01	Product Master Data Management	Master Data & Governance	High
BP-02	Location & Warehouse Setup	Master Data & Governance	High
BP-03	Stock Policy & Threshold Definition	Master Data & Governance	High
BP-04	ABC Product Classification	Master Data & Governance	Medium

ID	Process Name	Domain	Priority
BP-05	Purchase Order Placement	Inbound & Receiving	High
BP-06	Inbound Shipment Planning	Inbound & Receiving	Medium
BP-07	Goods Receipt & Verification	Inbound & Receiving	High
BP-08	Receipt Discrepancy Resolution	Inbound & Receiving	High
BP-09	Stock Put-Away & Storage	Inbound & Receiving	Medium
BP-10	Inventory Status Monitoring	Inventory Control	High
BP-11	Cycle Counting	Inventory Control	High
BP-12	Full Physical Inventory Count	Inventory Control	High
BP-13	Count Variance Investigation & Approval	Inventory Control	High
BP-14	Stock Adjustment & Write-Off	Inventory Control	High
BP-15	Shrinkage & Loss Management	Inventory Control	High
BP-16	Order Availability Confirmation	Order Fulfillment	High
BP-17	Inventory Reservation	Order Fulfillment	High
BP-18	Pick, Pack & Ship	Order Fulfillment	High
BP-19	Partial Fulfillment & Backorder Management	Order Fulfillment	High
BP-20	Outbound Exception Handling	Order Fulfillment	Medium
BP-21	Low-Stock Alert Review	Replenishment	High
BP-22	Replenishment Planning & Requisition	Replenishment	High
BP-23	Inbound Supply Tracking	Replenishment	Medium
BP-24	Inter-Location Transfer Request	Network Balance	High
BP-25	Inter-Location Transfer Execution	Network Balance	High
BP-26	Network Stock Rebalancing	Network Balance	Medium
BP-27	Customer Return Intake	Returns	Medium
BP-28	Return-to-Stock or Disposal Decision	Returns	Medium
BP-29	Inventory Performance Reporting	Performance Management	High
BP-30	Inventory Valuation & Financial Reconciliation	Financial Alignment	High
BP-31	Promotional & Launch Stock Readiness	Commercial Alignment	Medium
BP-32	Inventory Audit & Control Review	Governance & Compliance	High

Process Domain Overview

Domain	Processes	Business Purpose
Master Data & Governance	BP-01 – BP-04	Foundational reference data for all inventory operations
Inbound & Receiving	BP-05 – BP-09	Flow of goods from suppliers into inventory

Domain	Processes	Business Purpose
Inventory Control	BP-10 – BP-15	Accuracy, counting, adjustments, and loss management
Order Fulfillment	BP-16 – BP-20	Customer commitment through reservation to shipment
Replenishment	BP-21 – BP-23	Proactive restocking and inbound supply visibility
Network Balance	BP-24 – BP-26	Inter-location transfers and network optimization
Returns	BP-27 – BP-28	Reverse logistics and disposition
Performance & Financial	BP-29 – BP-30	Reporting, KPIs, and finance alignment
Commercial & Governance	BP-31 – BP-32	Campaign readiness and audit oversight

Standard Order Fulfillment Process Flow

```
Order Received → Availability Confirmation (BP-16) → Reservation (BP-17)
    → Pick, Pack & Ship (BP-18) → [Partial/Backorder if needed (BP-19)]
    → Exception Handling if required (BP-20) → Shipment Confirmed
```

Standard Inbound Process Flow

```
Replenishment Need → PO Placement (BP-05) → Inbound Planning (BP-06)
    → Goods Receipt & Verification (BP-07) → [Discrepancy Resolution (BP-08)]
    → Put-Away (BP-09) → Stock Available for Fulfillment
```

---

11. Actors and User Roles

Business Actors (Domain Analysis)

Twenty-seven business actors participate in inventory processes — 22 internal and 5 external. Business permissions describe operational authority (decision rights), not system access.

ID	Actor	Type	Primary Domain
A-01	Chief Executive Officer	Internal	Executive Leadership
A-02	Chief Operating Officer	Internal	Executive Leadership
A-03	Chief Financial Officer	Internal	Executive Leadership
A-04	Operations Director	Internal	Operations
A-05	Inventory Controller	Internal	Inventory Control
A-06	Warehouse Manager	Internal	Warehouse Operations
A-07	Receiving Clerk	Internal	Warehouse Operations
A-08	Warehouse Picker / Packer	Internal	Warehouse Operations
A-09	Warehouse Staff (General)	Internal	Warehouse Operations
A-10	Regional / Store Manager	Internal	Retail / Regional

ID	Actor	Type	Primary Domain
A-11	Sales Manager	Internal	Commercial
A-12	Sales Representative	Internal	Commercial
A-13	Customer Service Representative	Internal	Commercial
A-14	Marketing Manager	Internal	Commercial
A-15	Purchasing Manager	Internal	Procurement
A-16	Buyer / Procurement Officer	Internal	Procurement
A-17	Finance Manager / Accountant	Internal	Finance
A-18	Internal Auditor	Internal	Governance & Audit
A-19	External Auditor	External	Governance & Audit
A-20	Supplier / Vendor	External	Supply Chain
A-21	Logistics / Carrier Partner	External	Supply Chain
A-22	Freight Forwarder	External	Supply Chain
A-23	B2B Customer	External	Customer
A-24	B2C Customer	External	Customer
A-25	Regulatory Authority	External	Governance & Compliance

IMS User Roles

Nineteen business user roles are defined for system access. External parties (suppliers, carriers, customers) do not hold standing IMS accounts in MVP scope.

Role ID	Role Name	Type	Primary Responsibility
UR-01	Chief Executive Officer	Executive	Strategic accountability; executive KPI review
UR-02	Chief Operating Officer	Executive	Operational performance; policy approval
UR-03	Chief Financial Officer	Executive	Working capital; valuation oversight
UR-04	Operations Director	Management	Network-wide operations; transfer/adjustment approval
UR-05	Inventory Controller	Control	Product master, count programs, accuracy ownership
UR-06	Warehouse Manager	Management	Location operations; local approvals
UR-07	Receiving Clerk	Execution	Inbound receipt and verification
UR-08	Warehouse Picker / Packer	Execution	Order picking, packing, shipment preparation
UR-09	Warehouse Staff	Execution	Put-away, counting, material handling
UR-10	Regional / Store Manager	Management	Store stock; transfer requests
UR-11	Sales Manager	Management	Availability oversight; fulfillment monitoring
UR-12	Sales Representative	Execution	Customer availability confirmation
UR-13	Customer Service Representative	Execution	Order status; return intake

Role ID	Role Name	Type	Primary Responsibility
UR-14	Marketing Manager	Management	Campaign stock readiness
UR-15	Purchasing Manager	Management	Procurement strategy; PO approval
UR-16	Buyer / Procurement Officer	Execution	PO creation; supplier coordination
UR-17	Finance Manager / Accountant	Management	Valuation; reconciliation; shrinkage review
UR-18	Internal Auditor	Oversight	Control testing; audit trail review
UR-19	External Auditor	Oversight	Temporary read-only access during audit

Role Hierarchy (Summary)

```
Executive Leadership (CEO, COO, CFO)
    └── Operations Director
            ├── Warehouse Manager → Receiving Clerk, Picker/Packer, Warehouse Staff
            ├── Inventory Controller
            └── Regional / Store Manager
    └── Purchasing Manager → Buyer
    └── Sales Manager → Sales Representative
    └── Customer Service Representative
    └── Marketing Manager
    └── Finance Manager / Accountant
Governance: Internal Auditor, External Auditor (independent oversight)
```

---

12. Domain Knowledge

Core Inventory Concepts

Thirteen foundational concepts underpin all inventory management activities:

#	Concept	Business Meaning
1	Inventory as a Business Asset	Goods held for sale/distribution; balance-sheet asset affecting cash flow
2	Stock Visibility and Availability States	On-hand, reserved, committed, ATP, inbound expected — distinct meanings of "stock"
3	Product Identity and Master Data	Single SKU identity across all locations and departments
4	Inventory Locations and Distribution Network	Multi-site stock as a shared network resource
5	Stock Policy and Replenishment Planning	Reorder levels, safety stock, and proactive restocking
6	Procurement and Inbound Supply Chain	PO-to-receipt flow and supplier accountability
7	Order Fulfillment and Customer Commitment	Reservation through pick-pack-ship to delivery promise
8	Inventory Control and Physical Accuracy	Cycle counts, variances, adjustments, and accuracy programs

#	Concept	Business Meaning
9	Network Balancing and Stock Redistribution	Transfers to resolve location imbalances
10	Inventory Valuation and Financial Impact	Operational-to-financial alignment
11	Returns and Reverse Logistics	Return authorization, inspection, restock/disposal
12	Performance Measurement and Service Levels	Fill rate, turnover, accuracy, cycle time
13	Governance, Controls, and Accountability	Audit trail, segregation of duties, reason codes

Key Availability State Definitions

State	Definition
On-Hand	Physical quantity present at a location
Reserved	On-hand quantity committed to confirmed orders
Available-to-Promise (ATP)	On-hand minus reservations and non-sellable holds — quotable quantity
Inbound Expected	Open purchase order quantities not yet received
Quarantined	Physically present but excluded from sellable availability

Industry Best Practices Applied

- ABC classification to focus effort on high-impact SKUs
- Blind cycle counting to prevent bias
- Mandatory reason codes on all adjustments
- Independent approval for count variances and write-offs
- Network check before new purchase (transfer-before-buy discipline)
- ATP-only customer commitments
- Reservation at order confirmation

Common Industry Scenarios Addressed

- Multi-location stockout while excess exists elsewhere
- Receipt discrepancy with supplier dispute
- Partial fulfillment with customer acknowledgment
- Promotional launch without confirmed stock coverage
- Month-end valuation variance between operations and finance
- Pick failure due to record vs. shelf mismatch

---

13. Business Rules

Thirty-two industry business rules govern inventory operations. Rules are expressed as business policy, independent of system enforcement mechanism.

Availability and Customer Commitment

Rule	Statement
BR-1	Sell and promise only against available-to-promise quantity
BR-2	Reserve stock at order confirmation
BR-3	Do not ship without confirmed pick verification
BR-28	Backorder requires customer acknowledgment

Inbound and Procurement

Rule	Statement
BR-4	Inbound goods must be verified before acceptance into inventory
BR-5	Received stock is not available until put-away is complete
BR-6	Receipt discrepancies must be documented before acceptance
BR-7	Purchase order required before receiving supplier goods
BR-8	Three-way match required before supplier payment

Replenishment and Stock Policy

Rule	Statement
BR-9	Reorder action must trigger at or before reorder level
BR-10	Safety stock must not be bypassed without authorized exception

Network Balance

Rule	Statement
BR-11	Check network availability before placing new purchase
BR-12	Transfer must not deplete source below its minimum threshold

Quality and Rotation

Rule	Statement
BR-13	Quarantined stock must be excluded from sellable availability
BR-14	FEFO rotation required for shelf-life products
BR-15	FIFO rotation required for non-perishable standard goods

Rule	Statement
BR-16	Minimum remaining shelf life required at receipt
BR-17	Lot or batch must be captured for traceable products

Inventory Control and Governance

Rule	Statement
BR-18	Cycle counts must be performed blind
BR-19	Counter must not approve adjustments from their own count
BR-20	Every adjustment requires a reason code
BR-21	Adjustments above threshold require independent approval
BR-22	Investigate variance before applying adjustment
BR-23	Write-off requires documented evidence and authorization
BR-24	Physical inventory freeze during full wall-to-wall count
BR-32	Class A products require highest count and monitoring frequency

Returns and Commercial

Rule	Statement
BR-25	Returns require authorization before acceptance
BR-26	Returned goods must be inspected before restocking
BR-27	Discontinued products must not be reordered
BR-29	Promotional stock must be ring-fenced during campaign

Ownership and Trade

Rule	Statement
BR-30	Bonded inventory must not be released without customs clearance
BR-31	Consignment stock is not owned until consumption or sale event

---

14. Functional Requirements

Ninety functional requirements (FR-001–FR-090) define what the system must do from a business perspective. Requirements are grouped into twelve domains with MVP, Phase 2, or Phase 3 delivery tags.

Requirements Summary

Domain	Requirement IDs	Count	MVP Count
Master Data & Governance	FR-001 – FR-012	12	9
Inbound & Receiving	FR-013 – FR-022	10	6
Inventory Visibility & Status	FR-023 – FR-028	6	5
Inventory Control & Accuracy	FR-029 – FR-040	12	10
Order Fulfillment	FR-041 – FR-050	10	7
Replenishment & Inbound Supply	FR-051 – FR-057	7	3
Network Balance & Transfers	FR-058 – FR-063	6	3
Returns Management	FR-064 – FR-067	4	2
Reporting & Dashboards	FR-068 – FR-075	8	4
Notifications & Alerts	FR-076 – FR-080	5	2
User Access & Accountability	FR-081 – FR-085	5	5
Governance, Audit & Compliance	FR-086 – FR-090	5	4
Total		**90**	**60**

MoSCoW Prioritization Summary

Priority	Count	Percentage
Must Have	55	61%
Should Have	26	29%
Could Have	6	7%
Won't Have (Current Release)	3	3%

Domain 1: Master Data & Governance (FR-001 – FR-012)

ID	Requirement	Phase
FR-001	Create and maintain product master records (SKU, name, UOM, category)	MVP
FR-002	Manage product status lifecycle (active, inactive, discontinued)	MVP
FR-003	Support product identifier lookup (SKU, barcode)	MVP
FR-004	Detect and resolve duplicate product records	MVP
FR-005	Configure and maintain inventory locations	MVP
FR-006	Manage location hierarchy	MVP
FR-007	Plan location closure and stock disposition	Phase 2
FR-008	Define stock policy and replenishment thresholds	MVP

ID	Requirement	Phase
FR-009	Classify products by ABC priority	Phase 2
FR-010	Establish opening stock balance at location go-live	MVP
FR-011	Maintain standard reason codes	MVP
FR-012	Manage inventory governance policies	Phase 2

Domain 2: Inbound & Receiving (FR-013 – FR-022)

ID	Requirement	Phase
FR-013	Record purchase order commitments	Phase 2
FR-014	Plan and communicate expected inbound deliveries	Phase 2
FR-015	Receive and verify inbound goods	MVP
FR-016	Document and resolve receipt discrepancies	MVP
FR-017	Enforce PO reference for supplier receipts (with ad-hoc exception)	MVP
FR-018	Manage put-away and stock availability timing	MVP
FR-019	Receive return and non-PO inbound stock	MVP
FR-020	Support receipt quantity tolerance evaluation	Phase 2
FR-021	Cancel or amend open purchase orders	Phase 2
FR-022	Record supplier delivery performance	Phase 3

Domain 3: Inventory Visibility & Status (FR-023 – FR-028)

ID	Requirement	Phase
FR-023	Display on-hand quantity by product and location	MVP
FR-024	Display available-to-promise (ATP) quantity	MVP
FR-025	Display reserved and committed stock	MVP
FR-026	Indicate stock status (in stock, low stock, out of stock)	MVP
FR-027	Search and filter inventory views	MVP
FR-028	Display expected inbound and network-wide availability	Phase 2

Domain 4: Inventory Control & Accuracy (FR-029 – FR-040)

ID	Requirement	Phase
FR-029	Record all inventory movements with full history	MVP
FR-030	Schedule and assign cycle counts	MVP
FR-031	Perform blind cycle counts	MVP
FR-032	Conduct full physical inventory count	MVP

ID	Requirement	Phase
FR-033	Identify and report count variances	MVP
FR-034	Investigate and approve count adjustments	MVP
FR-035	Process stock adjustments with mandatory reason codes	MVP
FR-036	Process inventory write-offs with authorization	MVP
FR-037	Enforce adjustment approval thresholds	MVP
FR-038	Manage quarantine and hold stock status	MVP
FR-039	Analyze shrinkage and loss trends	Phase 2
FR-040	Review and action obsolete and slow-moving stock	Phase 2

Domain 5: Order Fulfillment (FR-041 – FR-050)

ID	Requirement	Phase
FR-041	Confirm order availability before commitment	MVP
FR-042	Reserve inventory for confirmed orders	MVP
FR-043	Release inventory reservations	MVP
FR-044	Support pick, pack, and ship workflow	MVP
FR-045	Handle partial fulfillment	MVP
FR-046	Manage backorders and replenishment priority	Phase 2
FR-047	Handle outbound fulfillment exceptions	MVP
FR-048	Support multi-location split fulfillment	Phase 2
FR-049	Display order fulfillment status	MVP
FR-050	Support authorized product substitution	Phase 2

Domain 6: Replenishment & Inbound Supply (FR-051 – FR-057)

ID	Requirement	Phase
FR-051	Generate low-stock and out-of-stock alerts	MVP
FR-052	Review and acknowledge stock alerts	MVP
FR-053	Generate replenishment suggestions	Phase 2
FR-054	Create and track purchase requisitions	Phase 2
FR-055	Track inbound supply status	Phase 2
FR-056	Enforce safety stock protection rules	Phase 2
FR-057	Support promotional stock readiness review	Phase 2

Domain 7: Network Balance & Transfers (FR-058 – FR-063)

ID	Requirement	Phase
FR-058	Request inter-location stock transfers	MVP
FR-059	Approve or reject transfer requests	MVP
FR-060	Execute and record inter-location transfers	MVP
FR-061	Monitor in-transit inventory	Phase 2
FR-062	Analyze and recommend network rebalancing	Phase 2
FR-063	Enforce source location minimum on transfers	Phase 2

Domain 8: Returns Management (FR-064 – FR-067)

ID	Requirement	Phase
FR-064	Authorize and record customer returns	MVP
FR-065	Receive and inspect returned goods	MVP
FR-066	Restock or write off returned inventory	Phase 2
FR-067	Track return processing status	Phase 2

Domain 9: Reporting & Dashboards (FR-068 – FR-075)

ID	Requirement	Phase
FR-068	Display inventory summary dashboard	MVP
FR-069	Generate stock movement reports	MVP
FR-070	Generate stockout and overstock reports	MVP
FR-071	Generate inventory accuracy and variance reports	MVP
FR-072	Provide location performance snapshots	Phase 2
FR-073	Report inventory performance KPIs	Phase 3
FR-074	Support basic replenishment reporting	Phase 2
FR-075	Support inventory valuation summary views	Phase 2

Domain 10: Notifications & Alerts (FR-076 – FR-080)

ID	Requirement	Phase
FR-076	Deliver low-stock and out-of-stock notifications	MVP
FR-077	Deliver pending approval notifications	MVP
FR-078	Deliver transfer and fulfillment exception alerts	Phase 2
FR-079	Deliver inbound supply delay notifications	Phase 2

ID	Requirement	Phase
FR-080	Deliver campaign and launch readiness alerts	Phase 2

Domain 11: User Access & Accountability (FR-081 – FR-085)

ID	Requirement	Phase
FR-081	Enforce role-based access control	MVP
FR-082	Restrict access by location	MVP
FR-083	Log user activity for accountability	MVP
FR-084	Enforce segregation of duties	MVP
FR-085	Manage user accounts and role assignments	MVP

Domain 12: Governance, Audit & Compliance (FR-086 – FR-090)

ID	Requirement	Phase
FR-086	Maintain complete audit trail of inventory changes	MVP
FR-087	Support audit and control review queries	MVP
FR-088	Detect and record control policy breaches	Phase 2
FR-089	Support financial inventory reconciliation	Phase 2
FR-090	Support initial data import for product and stock setup	MVP

---

15. Non-Functional Requirements

Two hundred four non-functional requirements define business-level quality expectations across eight categories. No technical design or implementation is specified.

NFR Summary

Category	ID Range	Count
Performance	NFR-PERF-001 – 027	27
Scalability	NFR-SCAL-001 – 022	22
Availability & Reliability	NFR-AVL / NFR-REL	25
Security	NFR-SEC-001 – 032	32
Logging	NFR-LOG-001 – 028	28
Monitoring	NFR-MON-001 – 026	26
Backup & Disaster Recovery	NFR-BDR-001 – 024	24
Compliance	NFR-COM-001 – 022	22

Category	ID Range	Count
Total		**204**

Performance Requirements (Selected — Must Have)

ID	Requirement	Success Metric
NFR-PERF-001	Routine operational screens respond without perceived delay	≥95% within 3 seconds
NFR-PERF-002	Stock availability lookup supports live customer conversations	≥98% within 2 seconds
NFR-PERF-003	Transaction confirmations complete promptly	≥95% within 2 seconds
NFR-PERF-007	System supports concurrent warehouse and office users	Minimum 50 concurrent users per location
NFR-PERF-011	Daily transaction throughput supports normal business volume	Baseline + 25% headroom
NFR-PERF-014	Notification delivery within business-relevant timeframe	≤5 minutes for critical alerts

Security Requirements (Selected — Must Have)

ID	Requirement	Success Criteria
NFR-SEC-001	Mandatory unique user authentication	100% attributed transactions; zero shared accounts
NFR-SEC-005	Role-based authorization enforced	Users access only permitted functions
NFR-SEC-006	Location-scoped access for transactional roles	No cross-location transactions without authorization
NFR-SEC-010	Password policy meets company standards	Complexity, expiry, lockout enforced
NFR-SEC-013	Complete audit trail for material changes	User, timestamp, before/after state
NFR-SEC-017	Inventory valuation data protected	Restricted to authorized finance/executive roles
NFR-SEC-029	Personal data handled per privacy regulations	GDPR/local compliance

Availability & Reliability (Selected — Must Have)

ID	Requirement	Target
NFR-AVL-001	System available during defined business hours	≥99.5% uptime during business hours
NFR-AVL-003	Planned maintenance outside peak periods	No disruption during blackout windows
NFR-REL-001	No unrecoverable loss of inventory transaction data	Zero data loss for recorded transactions
NFR-REL-005	Graceful handling of peak season transaction volume	No material degradation vs. normal hours

Scalability Requirements (Summary)

- Support current active SKU catalog without performance degradation
- Accommodate projected SKU growth over 18 months
- Scale to all primary locations on sequential rollout schedule
- Support increasing transaction volume as adoption reaches 90%
- Network-wide reporting without prohibitive delay at full rollout

Logging Requirements (Summary)

- Standard attributes on all log entries (timestamp, user, event type, entity)
- Before-and-after state for balance-changing events
- Complete coverage of business events (receipts, transfers, adjustments, reservations, fulfillments, counts, approvals)
- User action denial logging for security review
- Retention aligned to audit and legal requirements (5–7 years)

Monitoring Requirements (Summary)

- Essential function availability monitoring with alert routing
- Tier 1 executive and Tier 2 operational KPI monitoring
- Response time and throughput monitoring against NFR targets
- Transaction error and security event monitoring
- Defined alert severity, routing matrix, and escalation procedures

Backup & Disaster Recovery (Summary)

Metric	Target
Recovery Point Objective (transactions)	≤1 hour data loss maximum
Recovery Time Objective (essential functions)	≤4 business hours
Recovery Time Objective (full capability)	≤24 business hours
Backup frequency	Continuous transaction protection; daily full backup
Recovery testing	Periodic validated recovery tests

Compliance Requirements (Summary)

- GDPR and local data protection compliance for user and customer-linked data
- Financial record retention (5–7 years) for transactions, adjustments, valuation
- Segregation of financially material transactions
- Complete and immutable audit trail
- Independent auditor access during audit periods
- Consumer protection for availability and delivery commitments
- Employment law compliance for performance monitoring policies

---

16. User Roles and Permissions

RBAC Design Principles

Principle	Application
Least Privilege	Roles receive only permissions required for documented responsibilities
Segregation of Duties	Initiate/approve pairs never granted to same role
Location Scoping	Transactional permissions constrained to assigned locations
Executive Read-Only	CEO and CFO have broad visibility without transactional authority
Audit Independence	Auditors have read/query access only
Count Independence	Counters cannot approve their own count results

Permission Groups

Group	Scope	Example Permissions
PG-01 Products	Master data	Create, update, status, lookup, ABC classification
PG-02 Locations	Network setup	Create, update, hierarchy, closure, opening balance
PG-03 Visibility	Stock inquiry	On-hand, ATP, reserved, status, search, history
PG-04 Control	Accuracy	Thresholds, counts, adjustments, write-offs, quarantine
PG-05 Transfers	Network balance	Request, approve, dispatch, receive, rebalancing
PG-06 Purchasing	Procurement	Requisitions, PO create/approve/amend
PG-07 Receiving	Inbound	Receive, discrepancy, put-away, ad-hoc receipt
PG-08 Fulfillment	Outbound	Reserve, pick, pack, ship, exceptions
PG-09 Returns	Reverse logistics	Authorize, receive, inspect, restock/dispose
PG-10 Commercial	Sales/CS	Availability, order status, launch readiness
PG-11 Reports	Analytics	Dashboards, movement, accuracy, KPI reports
PG-12 Finance	Valuation	Valuation views, reconciliation, shrinkage reports
PG-13 Setup	Governance	Policies, reason codes, safety stock overrides
PG-14 Admin	System	User accounts, role assignment (System Administrator)
PG-15 Audit	Oversight	Audit trail query, control review

Role Permission Summary (High Level)

Role	Primary Permission Groups
CEO	PG-03 (read), PG-11, PG-12 (read)
COO	PG-02, PG-03, PG-04, PG-05, PG-06, PG-08, PG-10, PG-11, PG-12, PG-13
CFO	PG-03 (read), PG-11, PG-12 (read)

Role	Primary Permission Groups
Operations Director	PG-02, PG-03, PG-04, PG-05, PG-06, PG-08, PG-11, PG-13
Inventory Controller	PG-01, PG-03, PG-04, PG-11, PG-13
Warehouse Manager	PG-03, PG-04, PG-05, PG-07, PG-08, PG-09, PG-11
Receiving Clerk	PG-03 (limited), PG-07, PG-09
Picker/Packer	PG-03 (limited), PG-08
Warehouse Staff	PG-03 (limited), PG-04 (count only), PG-07 (put-away)
Regional/Store Manager	PG-03, PG-05 (request), PG-11
Sales Manager	PG-03, PG-08 (status), PG-10, PG-11
Sales Representative	PG-03 (ATP), PG-08 (status)
Customer Service Rep	PG-03, PG-08, PG-09
Marketing Manager	PG-03, PG-10, PG-11
Purchasing Manager	PG-03, PG-06, PG-10, PG-11
Buyer	PG-03, PG-06, PG-11
Finance Manager	PG-03, PG-11, PG-12, PG-15
Internal Auditor	PG-03, PG-04 (read), PG-11, PG-12, PG-15
External Auditor	PG-03, PG-04 (read), PG-11, PG-12, PG-15 (temporary)

Separation of Duties Rules (Selected)

Rule	Conflict	Resolution
SOD-001	Create and approve purchase order	Buyer creates; Purchasing Manager approves
SOD-003	Perform count and approve count adjustment	Warehouse Staff counts; InvCtrl/WHMgr approves
SOD-004	Request and approve stock adjustment	WHMgr requests; OpsDir/InvCtrl approves
SOD-006	Request and approve stock transfer	RegMgr/WHMgr requests; OpsDir/COO approves
SOD-007	Receive goods and approve receipt beyond tolerance	Receiving Clerk receives; WHMgr approves variance
SOD-018	Approve PO and receive goods for same PO	Separate approver and receiver
SOD-015	Operational transactions and user administration	System Administrator only for PG-14

Location Scoping Rules

- Transactional roles (Receiving Clerk, Picker/Packer, Warehouse Staff, Warehouse Manager) operate within assigned location(s) only
- Regional/Store Managers see assigned store(s) with optional network read for transfers
- Network-wide visibility granted to Operations Director, Inventory Controller, COO, and executive roles
- Sales roles see ATP across all fulfillment locations relevant to customer commitments

17. Assumptions

Forty-six business assumptions underpin this initiative. Critical assumptions must be validated before or at project kickoff.

Critical Assumptions (Validate Before Kickoff)

ID	Assumption	Risk if False
BA-01	Executive leadership remains committed for 18 months	Scope reduction, poor adoption
BA-03	Inventory Controller role exists or will be assigned	Chronic inaccuracy, no accountability
BA-14	Usable product catalog available within 60 days of project start	Delayed go-live
BA-16	Opening stock balances verified before each location go-live	System starts with embedded errors
BA-24	Approved budget covers full 18-month vision period	Project paused or descoped
BA-29	Business model remains distribution/retail (no manufacturing pivot)	Fundamental scope invalidation
BA-30	IMS will not replace ERP, CRM, or accounting systems	Scope creep, stakeholder resistance
BA-31	Primary locations represent ≥80% of inventory volume	Network objectives unachievable
BA-34	Warehouse staff willing to adopt system-mandated recording	Dual systems persist
BA-35	Management will enforce retirement of parallel manual tools	Accuracy objectives fail

Assumption Categories

Category	Count	Examples
Organizational & People	6	Executive sponsorship, SME availability, Inventory Controller assignment
Process & Operations	7	Standardizable processes, monthly cycle counts feasible, reason code enforcement
Data & Product Information	5	Clean product catalog, unique SKUs, ABC classification agreement
Supply Chain & External	5	Stable supplier lead times, delivery documentation, manageable returns volume
Financial & Commercial	5	Approved budget, material carrying cost, interim valuation method
Strategic & Scope	5	No manufacturing pivot, no M&A during first 12 months
Change Management & Adoption	5	Training capacity, sales behavior change, no labor restrictions
Governance & Compliance	4	Policy updates feasible, segregation of duties definable
Timeline & Resources	4	Sequential rollout, SME time commitment, baseline measurement

---

18. Constraints

Thirty-eight business constraints bound delivery and adoption. Four are classified as **blocking**.

Blocking Constraints

ID	Constraint	Impact
BC-01	Fixed total initiative budget with no overrun guarantee	Ruthless scope prioritization; MVP focus
TC-02	MVP must be live at first primary location within 6 months	Only must-have features in first release
OC-01	No operational shutdown for go-live	Phased cutover; rollback plan required
ORC-07	No mature centralized inventory management function today	Inventory Controller must be created; policies written

Constraint Categories

Category	Count	Key Constraints
Budget (BC)	6	Fixed budget, no new warehouse headcount, capex/opex limits
Time (TC)	6	18-month vision, 6-month MVP, sequential rollout, peak season blackouts
Legal (LC)	5	Data protection, record retention, labor law, consumer protection
Operational (OC)	8	No shutdown, maintain service levels, fixed warehouse layout
Organizational (ORC)	7	Part-time SME team, change resistance, decentralized locations
Technology — Business Level (TEC)	6	Coexist with existing systems, no dedicated hardware, browser access, manual finance exchange in year 1

Compounding Constraint Interactions

Interaction	Combined Impact
Budget + Time	MVP must deliver maximum value within fixed budget and 6-month deadline
Budget + Organizational	No new hires and no full-time project team — existing staff absorb project and operations
Operational + Time	Go-live must be non-disruptive AND avoid peak seasons — narrow rollout windows
Organizational + Technology	Resistant users must work across multiple systems without integration

---

19. Risks

Strategic and Organizational Risks

Risk	Likelihood	Impact	Mitigation
Low user adoption; parallel manual tools persist	Medium	Critical	Change management investment; management enforcement policy (BO-22); adoption monitoring (KPI-22)
Inventory Controller role not assigned	Medium	Critical	Confirm role assignment before Phase 1 go-live (BA-03)
Executive sponsorship weakens	Low	Critical	Steering committee charter; monthly KPI reviews

Risk	Likelihood	Impact	Mitigation
Decentralized location managers reject standardization	Medium	High	Local champions; Operations Director endorsement; phased rollout
SME unavailability delays decisions	High	High	Secure 20% time commitment in writing; batch decision sessions

Data and Process Risks

Risk	Likelihood	Impact	Mitigation
Product catalog not ready for go-live	Medium	High	60-day data audit; Inventory Controller ownership (BA-14)
Opening balances inaccurate at cutover	Medium	Critical	Pre-go-live physical count; Operations Director sign-off (BA-16)
Baseline KPI data unavailable	Medium	High	30–60 day pre-go-live baseline collection (BA-45)
Returns volume exceeds manual handling capacity	Low	Medium	Validate 12-month return volume; scope exception if >5% (BA-13)

Operational and Commercial Risks

Risk	Likelihood	Impact	Mitigation
Go-live disrupts fulfillment service levels	Medium	High	Avoid peak seasons; hypercare support; rollback plan (OC-02)
Channel overselling until integration delivered	High	Medium	Manual channel sync processes; partner SLA review (TEC-04)
Supplier lead time increases invalidate thresholds	Medium	Medium	Monthly lead time monitoring; threshold review (BA-19)
Finance reconciliation remains manual and delayed	High	Medium	Assign finance liaison; agree interim valuation method (BA-06, TEC-05)

Financial and Compliance Risks

Risk	Likelihood	Impact	Mitigation
Budget overrun forces scope reduction	Medium	High	Scope discipline; change control; defer Phase 2/3 features
Segregation of duties cannot be enforced in small teams	Medium	Medium	Document authorized exceptions; audit flagging (SOD rules)
New regulatory requirements imposed	Low	High	Quarterly regulatory review (BA-32)
Audit findings on inventory controls	Medium	Medium	Pre-go-live control design testing; Internal Auditor involvement

20. Success Metrics

Twenty-eight business KPIs determine initiative success. All current-state values are estimates to be validated during pre-go-live baseline collection.

Tier 1 — Executive KPIs

ID	Metric	Current (Est.)	Target (Month 12)
KPI-01	Inventory Record Accuracy Rate	78%	≥95%
KPI-02	Inventory Data Trust Score	2.4/5.0	≥4.0/5.0
KPI-03	Order Fill Rate	84%	≥92%
KPI-04	Revenue at Risk from Stockouts	7–9%	≤3%
KPI-05	On-Time Delivery Rate	79%	≥90%
KPI-06	Inventory Turnover Ratio	4.2×	+15% vs. baseline
KPI-07	Excess Inventory Value	22% of total	−20% vs. baseline (Month 18)
KPI-08	Inventory Carrying Cost	24%	−10% vs. baseline
KPI-09	Shrinkage & Write-Off Value	2.8%	−25% vs. baseline (Month 18)
KPI-10	Working Capital in Inventory	38%	−10% vs. baseline (Month 18)
KPI-26	Management Growth Confidence	2.6/5.0	≥4.0/5.0 (Month 18)
KPI-27	NPS — Fulfillment Reliability	+18	+10 points (Month 18)
KPI-28	Return on Inventory Investment	Not positive	Positive by Month 18

Tier 2 — Operational KPIs

ID	Metric	Current (Est.)	Target (Month 12)
KPI-11	Order Fulfillment Cycle Time	36 hours	−30%
KPI-12	Priority SKU Stockout Rate	12%	−50%
KPI-13	Stock-Related Cancellation Rate	4.5%	≤2%
KPI-14	Emergency Procurement Spend Share	14%	≤5%
KPI-15	Replenishment Response Time	4.8 days	≤2 days (90% compliance)
KPI-16	Cross-Location Imbalance Events	85/month	−40%
KPI-17	Manual Reconciliation Hours	120/week	−60% (Month 9)
KPI-18	CS Handle Time (Stock Inquiries)	11 min	−40% (Month 9)
KPI-19	Sales Self-Service Availability Rate	25%	≥90% (Month 6)
KPI-20	Valuation Variance (Ops vs. GL)	8%	≤2%
KPI-21	Month-End Close Duration	7 days	≤3 days
KPI-22	Active User Adoption Rate	0%	≥90%

ID	Metric	Current (Est.)	Target (Month 12)
KPI-23	Movement Recording Compliance	65%	≥98%
KPI-24	Audit Trail Completeness	40%	100%

Tier 3 — Tactical KPIs

ID	Metric	Target
KPI-25	Promotional Launch Readiness Rate	≥95% by Month 12

Phased Target Summary

Phase	Period	Key Targets
Phase 1 — Stabilize	Months 0–6	Accuracy ≥90%; adoption ≥90%; trust ≥3.5; sales self-service ≥90%
Phase 2 — Perform	Months 6–12	Fill rate ≥92%; on-time ≥90%; stockouts −50%; valuation variance ≤2%
Phase 3 — Optimize	Months 12–18	Turnover +15%; excess −20%; positive ROI; confidence ≥4.0

RAG Status Definitions

Status	Definition	Action
Green	At or above target	Maintain; share best practices
Amber	Within 10% of target or improving	Monitor; assign corrective action owner
Red	>10% below target and not improving	Escalate to steering committee within 2 weeks

---

21. Glossary

Standard business vocabulary for inventory management operations. Terms are business definitions only.

Term	Definition
ABC Classification	Product segmentation by business importance (revenue, velocity, criticality) to prioritize operational effort
Available-to-Promise (ATP)	Stock not reserved, committed, quarantined, or otherwise unavailable — the only quotable quantity for new sales
Audit Trail	Chronological record of inventory changes with user identity, timestamp, and reason
Backorder	Customer-agreed delay to fulfill remaining order quantity when full quantity is unavailable at confirmation
Carrying Cost	Total cost of holding inventory (storage, insurance, obsolescence, capital charge)
Committed Stock	Inventory allocated to confirmed customer orders pending fulfillment
Cycle Count	Partial physical count of selected SKUs/locations on a rotating schedule without full shutdown

Term	Definition
Fill Rate	Percentage of order lines fulfilled in full on first shipment
Goods Receipt	Formal recording of verified inbound goods into inventory
Inventory Accuracy	Agreement between system records and physical stock, measured through counts
Inventory Location	Physical place where stock is held and tracked (warehouse, store, distribution point)
Inventory Turnover	Cost of goods sold divided by average inventory value — speed of inventory movement
Inter-Location Transfer	Movement of stock between inventory locations within the network
Lead Time	Elapsed time from order placement to goods availability for use or sale
Low Stock	Product at or below defined reorder level or minimum threshold
On-Hand Stock	Physical quantity of a product at a location at a point in time
Order Reservation	Operational hold on stock for a confirmed order, reducing ATP
Overstock	Inventory above defined maximum level for an active product
Partial Fulfillment	Shipping available quantity when full order quantity cannot be met
Pick, Pack, and Ship	Warehouse process of retrieving, preparing, and dispatching ordered goods
Purchase Order (PO)	Authorized commercial commitment to a supplier specifying products, quantities, and terms
Purchase Requisition	Internal request for procurement approval before PO creation
Put-Away	Moving received goods from dock to designated storage location
Reason Code	Mandatory categorized explanation for an inventory adjustment or exception
Receipt Discrepancy	Difference between expected and received quantity, product, or condition
Reorder Level	Stock level triggering replenishment action accounting for lead time and demand
Replenishment	Process of restocking products to maintain target inventory levels
Reserved Stock	On-hand quantity committed to confirmed orders
Safety Stock	Buffer inventory above reorder level to protect against demand or supply variability
Segregation of Duties	Separation of conflicting responsibilities (e.g., count vs. approve) to prevent fraud and error
Shrinkage	Unexplained inventory loss from theft, damage, misplacement, or process error
SKU (Stock Keeping Unit)	Unique identifier for a distinct product tracked in inventory
Stock Adjustment	Correction to recorded inventory quantity with documented reason
Stock Rebalancing	Proactive redistribution of stock across network to resolve imbalances
Stockout	Zero available-to-promise quantity for a product at a location
Unit of Measure (UOM)	Standard quantity unit for counting, ordering, and selling a product
Write-Off	Formal removal of inventory value for damaged, obsolete, or lost goods

For complete definitions of 50+ terms, refer to the Business Glossary and Advanced Inventory Management Glossary in Domain Knowledge artifacts.

22. Appendices

Appendix A: Traceability Matrix (Summary)

Business Element	Traces To
Pain Points PP-01 – PP-28	Business Vision, Functional Requirements, Objectives
Business Processes BP-01 – BP-32	Functional Requirements FR-001 – FR-090
Business Rules BR-1 – BR-32	Functional Requirements, SoD Rules
SMART Objectives BO-01 – BO-24	Success Metrics KPI-01 – KPI-28
User Roles UR-01 – UR-19	RBAC Matrix, Permission Groups
Assumptions BA-01 – BA-46	Constraints, Risks
Constraints BC/TC/LC/OC/ORC/TEC	Scope, NFRs, Assumptions

Appendix B: Feature Catalog (F-01 – F-30)

Feature ID	Feature Name	Primary FRs
F-01	Product Master Management	FR-001 – FR-004
F-02	Location & Network Management	FR-005 – FR-007, FR-010
F-03	Stock Policy & Thresholds	FR-008, FR-011, FR-012
F-04	ABC Classification	FR-009
F-05	Purchase Order Management	FR-013, FR-021, FR-022
F-06	Inbound Planning & Visibility	FR-014, FR-055
F-07	Goods Receipt & Verification	FR-015 – FR-017, FR-020
F-08	Put-Away Management	FR-018
F-09	Return & Non-PO Receipt	FR-019
F-10	Inventory Visibility & Search	FR-023 – FR-028
F-11	Movement History & Traceability	FR-029, FR-086
F-12	Cycle & Physical Counting	FR-030 – FR-034
F-13	Adjustments & Write-Offs	FR-035 – FR-037
F-14	Quarantine & Hold Management	FR-038
F-15	Shrinkage & Obsolescence Analysis	FR-039, FR-040
F-16	Order Availability & Reservation	FR-041 – FR-043
F-17	Pick, Pack & Ship	FR-044, FR-047
F-18	Partial Fulfillment & Backorders	FR-045, FR-046
F-19	Multi-Location Fulfillment	FR-048
F-20	Order Status Visibility	FR-049, FR-050

Feature ID	Feature Name	Primary FRs
F-21	Replenishment Alerts & Suggestions	FR-051 – FR-054, FR-056
F-22	Promotional Readiness	FR-057, FR-080
F-23	Inter-Location Transfers	FR-058 – FR-063
F-24	Returns Management	FR-064 – FR-067
F-25	Operational Dashboards & Reports	FR-068 – FR-072, FR-074
F-26	KPI & Executive Reporting	FR-073, FR-075
F-27	Notifications & Alerts	FR-076 – FR-079
F-28	Role-Based Access Control	FR-081 – FR-085
F-29	Audit & Compliance Support	FR-087 – FR-089
F-30	Initial Data Import	FR-090

Appendix C: Pain Point Register (Summary)

ID	Pain Point	Severity	Addressed By
PP-01	No trusted network-wide visibility	Critical	FR-023–FR-028, BO-01
PP-02	Stock imbalances across locations	Critical	FR-058–FR-063, BO-14
PP-03	Chronic physical vs. recorded discrepancies	Critical	FR-029–FR-037, BO-02
PP-04	Sales commits without confirmed availability	Critical	FR-024, FR-041, BO-16
PP-05	Finance and operations records misaligned	Critical	FR-075, FR-089, BO-18
PP-06	Reactive replenishment	High	FR-051–FR-054, BO-13
PP-07	Fragmented records and parallel tracking	High	FR-029, BO-22
PP-08	Inconsistent processes across locations	High	FR-012, BO-03
PP-09	No formal inventory accountability	High	UR-05, FR-012
PP-10	Slow and opaque fulfillment	High	FR-044–FR-049, BO-06
PP-11	Pick failures (record vs. shelf)	High	FR-018, FR-031, BO-02
PP-12	Poor inbound supply visibility	High	FR-013–FR-014, FR-055
PP-13	Duplicate purchasing	High	FR-024, FR-053, BR-11
PP-14	Under-stocking high-demand products	High	FR-051, BO-07
PP-15	Overstock and trapped capital	High	FR-070, BO-09
PP-16	Weak shrinkage accountability	High	FR-035, FR-039, BO-11
PP-17	Incomplete audit trail	High	FR-086, BO-19
PP-18	Cycle count discipline not sustained	High	FR-030–FR-034, BO-02
PP-19 – PP-28	Medium/Low pain points	Medium–Low	Various FRs and process improvements

Appendix D: Business Assumption Register (Full List)

BA-01 through BA-46 documented in Business Assumptions artifact, categorized: Organizational (6), Process (7), Data (5), Supply Chain (5), Financial (5), Strategic (5), Change Management (5), Governance (4), Timeline (4).

Appendix E: Business Constraint Register (Full List)

BC-01 through BC-06 (Budget), TC-01 through TC-06 (Time), LC-01 through LC-05 (Legal), OC-01 through OC-08 (Operational), ORC-01 through ORC-07 (Organizational), TEC-01 through TEC-06 (Technology — business level).

Appendix F: Related Document Index

Document	Location	Purpose
Business Vision	Business Discovery	Strategic rationale
Project Scope	Business Discovery	In/out scope definition
SMART Business Objectives	Business Discovery	Measurable outcomes
Stakeholder Analysis	Business Discovery	Stakeholder needs and interactions
Business Assumptions	Business Discovery	Underpinning beliefs
Business Constraints	Business Discovery	Delivery boundaries
Success Metrics	Business Discovery	KPI definitions
Business Process Analysis	Domain Analysis	32 core processes
Business Actor Analysis	Domain Analysis	27 actors
Business Pain Points	Domain Analysis	28 current-state problems
Business Glossary	Domain Analysis	Standard vocabulary
Core Inventory Concepts	Domain Knowledge	Foundational concepts
Industry Business Rules	Domain Knowledge	32 operational rules
Functional Requirements Specification	Functional Requirements	FR-001 – FR-090 detail
Non-Functional Requirements (8 documents)	Non-Functional Requirements	204 NFRs
User Roles	User Roles	UR-01 – UR-19 profiles
RBAC Matrix	Permissions	Role-permission mapping
Separation of Duties Rules	Permissions	SOD-001 – SOD-020

Appendix G: Document Summary Statistics

Artifact	Count
SMART Business Objectives	24
Stakeholder Profiles	29
Business Processes	32
Business Actors	27

Artifact	Count
IMS User Roles	19
Pain Points	28

Features	30
User Stories	90
Non-Functional Requirements	204
System Permissions	100
Separation of Duties Rules	20
Business Assumptions	46
Business Constraints	38
Success KPIs	28

Document Approval

This Business Requirements Document represents the consolidated business requirements for the Inventory Management System initiative. Upon approval, it becomes the baseline for delivery planning, solution design (in subsequent phases), user acceptance testing, and change control.

Requirements Traceability Matrix (RTM)

Inventory Management System

Document Information

Attribute	Detail
Document ID	RTM-IMS-001
Version	1.0
Status	For Stakeholder Review
Document Owner	Senior Business Analyst
Date	July 3, 2026
Based On	BRD-IMS-001, Functional Requirements (FR-001–FR-090), User Stories (US-001–US-090), Acceptance Criteria, SMART Business Objectives (BO-01–BO-24), Business Processes (BP-01–BP-32), User Roles (UR-01–UR-19)

Traceability Convention

Identifier	Layer
BO-xx	Business Objective (SMART)
BP-xx	Business Process
FR-xxx	Functional Requirement
US-xxx	User Story (1:1 with FR)
AC-xxx-*	Acceptance Criteria (4 categories per story: H, V, E, X)
UR-xx	User Role

Trace direction: BO → BP → FR → US → AC ← UR (role executes story)

1. Executive Summary

Traceability Health Dashboard

Traceability Link	Source Count	Target Count	Coverage	Status
FR → US	90	90	**100%**	Complete (1:1)

Traceability Link	Source Count	Target Count	Coverage	Status
US → AC	90	90 story sections (~360 criteria)	**100%**	Complete
FR → BP	90	32 processes	**100%**	All BPs referenced by ≥1 FR
FR → BO (explicit in FR doc)	90	24 objectives	**29%**	**Gap — only 7 BOs explicitly cited**
FR → BO (derived/analyst mapping)	90	24 objectives	**96%**	23/24 BOs mapped (see Section 4)
US → UR (formal catalog)	90	19 roles	**94%**	System Administrator not in UR catalog
BO → AC (direct)	24	—	**0%**	No KPI thresholds in AC (indirect via FR only)
BP → BO (direct)	32	24	**Partial**	Not documented in source artifacts

Overall Assessment

Dimension	Rating	Summary
Vertical traceability (FR→US→AC)	Strong	Complete 1:1:1 chain; every FR has testable acceptance criteria
Horizontal traceability (BO→BP→FR)	Moderate	BP coverage complete; BO linkage mostly implicit, not authored in FR text
Role traceability (UR→US→FR)	Moderate	Story roles defined; 3 stories use roles outside UR catalog
Release traceability (MoSCoW vs Phase)	Weak	4 FR conflicts between phase tags and MoSCoW priority
Gap remediation readiness	Conditional	10 orphan/deferred items and 8 duplicate pairs require errata before sprint 1

---

2. Gap Analysis

2.1 Missing Traceability

Gap ID	Missing Link	Detail	Severity	Recommendation
MT-01	**BO → FR (explicit)**	Only BO-01, BO-03, BO-04, BO-05, BO-06, BO-07 appear in FR Business Value fields; BO-08–BO-24 lack explicit FR citations	High	Add BO reference column to all FR records; update RTM as living document
MT-02	**BO → AC (KPI thresholds)**	SMART targets (e.g., ≥95% accuracy, ≥92% fill rate) absent from acceptance criteria	High	Add Acceptance Test Plan appendix linking BO/KPI to E2E scenarios
MT-03	**BO → BP (direct matrix)**	No authored BO-to-process mapping in discovery artifacts	Medium	Add BO-BP matrix to BRD Appendix

Gap ID	Missing Link	Detail	Severity	Recommendation
MT-04	**BP → US (direct)**	Traceability passes through FR only; no BP column on user stories	Low	Acceptable if FR→BP maintained; optional BP tag on US
MT-05	**UR → PERM (permissions)**	RBAC matrix exists separately; not linked in RTM	Medium	Cross-reference UR-xx to PERM groups in permissions artifacts
MT-06	**External system boundary**	Order intake, finance sync, channel feeds have no FR/US/AC	High	Add integration boundary FR (order data contract, export format)
MT-07	**NFR → BO/FR**	204 NFRs not traced to business objectives in RTM	Medium	Add NFR traceability matrix in separate artifact
MT-08	**E2E scenario → multi-US**	No golden-path AC spanning receive→ATP→reserve→pick	Medium	Create E2E scenario catalog referencing US-015, US-018, US-024, US-042, US-044

2.2 Orphan Requirements

Orphans are requirements with no upstream business justification, no downstream test artifact, or no committed release slot.

Orphan ID	Requirement	Orphan Type	Explanation
OR-01	**FR-057, US-057, AC-057**	Release orphan	MoSCoW = Won't Have (current release) but fully specified with AC — risks wasted build/test effort
OR-02	**FR-062, US-062, AC-062**	Release orphan	MoSCoW = Won't Have; network rebalancing deferred but backlog-ready
OR-03	**FR-080, US-080, AC-080**	Release orphan	MoSCoW = Won't Have; tied to deferred FR-057
OR-04	**FR-050, US-050, AC-050**	Dependency orphan	Could Have / Phase 3; depends on undefined substitute master (no FR for alternate SKU relationships)
OR-05	**FR-022, US-022, AC-022**	Data orphan	Phase 3 supplier performance; no supplier master entity (FR-013 references supplier without maintenance FR)
OR-06	**US-081, US-082, US-085**	Role orphan	Stories assign **System Administrator** — not in UR-01–UR-19 business role catalog
OR-07	**BO-22**	Objective orphan	"Retire parallel manual tools" is organizational; no FR directly validates retirement — only enables replacement
OR-08	**BO-21**	Objective orphan	"90% user adoption" measured operationally; no FR defines adoption tracking (monitoring NFR only)
OR-09	**Integration stories**	Story orphan	No US for external order system, finance export consumer, or supplier actor (A-20)
OR-10	**BP-05, BP-06 (MVP window)**	Process orphan at MVP	Purchase order placement and inbound planning have no MVP FR (FR-013/014 are Phase 2) — process partially manual at go-live

2.3 Duplicate Requirements

Duplicates are overlapping requirements that may cause double-build, conflicting behavior, or redundant test effort.

Dup ID	Requirements	Relationship	Risk	Resolution
DUP-01	**FR-019 ↔ FR-065**	Same business capability (return receipt) at MVP vs Phase 2	Double implementation	FR-019 = MVP interim; FR-065 supersedes when F-21 ships
DUP-02	**FR-057 ↔ FR-080**	Readiness review vs readiness alert — same evaluation	Redundant logic	Merge or make FR-080 notification wrapper on FR-057
DUP-03	**FR-016 ↔ FR-020**	Receipt discrepancy vs tolerance evaluation	Overlapping variance handling	FR-020 = automated pre-check; FR-016 = human resolution workflow
DUP-04	**FR-029 ↔ FR-015/044/035/060**	Umbrella movement history vs process-specific movements	Misread as separate feature	Reframe FR-029 as cross-cutting quality attribute
DUP-05	**FR-039 ↔ FR-040 ↔ FR-070**	Shrinkage, obsolescence, overstock analytics	Reporting overlap	FR-039 = loss by reason; FR-040 = aging; FR-070 = threshold breach
DUP-06	**FR-074**	Listed in features F-20 and F-22	Planning duplication	Single owner: F-20 Reports; F-22 consumes output
DUP-07	**F-26 ↔ domain notification FRs**	FR-076–080 in F-26 plus domain features	Sprint double-count	F-26 = capability layer, not separate increment
DUP-08	**US-019 ↔ US-065 AC**	Nearly identical acceptance criteria for return receipt paths	Redundant test cases	Tag MVP vs Phase 2 cutover in AC

2.4 Uncovered Business Objectives

BO ID	Objective (Short)	Priority	FR Coverage	Coverage Level	Gap Notes
BO-01	Single trusted inventory view	P1	FR-023, FR-024, FR-027, FR-068	**Strong**	Explicit in FR doc
BO-02	Inventory record accuracy ≥95%	P1	FR-030–FR-034, FR-031, FR-071	**Strong**	Explicit in FR doc
BO-03	100% standardized movement recording	P1	FR-029, FR-015, FR-044, FR-060, FR-035	**Strong**	Explicit in FR doc
BO-04	60% reduction in manual reconciliation	P2	FR-023–FR-027, FR-068, FR-069	**Moderate**	Explicit in FR doc; no KPI in AC
BO-05	Order fill rate ≥92%	P2	FR-041–FR-045, FR-047	**Strong**	Explicit in FR doc

BO ID	Objective (Short)	Priority	FR Coverage	Coverage Level	Gap Notes
BO-06	30% faster fulfillment cycle time	P2	FR-044, FR-049	**Moderate**	Explicit in FR doc; no cycle-time AC
BO-07	50% fewer priority SKU stockouts	P2	FR-051, FR-008, FR-070	**Moderate**	Explicit in FR doc (note: FR-075 cites BO-07 erroneously — should be BO-18)
BO-08	40% fewer stock-related cancellations	P2	FR-041, FR-024, FR-045	**Moderate**	Derived mapping only; no explicit FR citation
BO-09	20% reduction in excess inventory	P3	FR-070, FR-040, FR-053	**Moderate**	Phase 2/3 FRs; weak at MVP
BO-10	15% inventory turnover improvement	P3	FR-073, FR-075, FR-040	**Weak**	Depends on Phase 3 FR-073; finance data external
BO-11	25% reduction in write-offs/shrinkage	P2	FR-035, FR-036, FR-039, FR-011	**Strong**	Derived mapping
BO-12	30% reduction in emergency procurement	P2	FR-051, FR-053, FR-054	**Moderate**	Phase 2 replenishment FRs
BO-13	90% replenishment within 2 days	P2	FR-051, FR-052, FR-054, FR-076	**Moderate**	Phase 2 FR-054; alert only at MVP
BO-14	40% fewer cross-location imbalances	P2	FR-058–FR-063, FR-028, FR-070	**Moderate**	FR-062 Won't Have weakens automation
BO-15	90% on-time delivery rate	P2	FR-044, FR-049, FR-041	**Moderate**	Delivery tracking partially manual (TEC-04)
BO-16	90% sales self-service availability	P1	FR-024, FR-027, FR-023	**Strong**	Derived; supports P1 objective
BO-17	40% faster CS resolution	P2	FR-049, FR-024, FR-025	**Moderate**	Derived mapping
BO-18	≤2% valuation variance	P3	FR-075, FR-089	**Moderate**	Phase 2; manual finance bridge at MVP
BO-19	100% audit trail coverage	P1	FR-086, FR-083, FR-011, FR-029, FR-035	**Strong**	Derived mapping
BO-20	Month-end close ≤3 days	P3	FR-089, FR-075, FR-071	**Moderate**	Phase 2 finance reconciliation
BO-21	90% active user adoption	P1	FR-081–FR-085 (enablers)	**Weak**	No FR measures adoption; organizational metric
BO-22	Zero parallel manual tracking tools	P1	— (no direct FR)	**Uncovered**	Change management objective; system enables but does not enforce retirement
BO-23	Management growth confidence ≥4.0	P3	FR-068, FR-073	**Weak**	Primarily survey-based; FR-073 Phase 3

BO ID	Objective (Short)	Priority	FR Coverage	Coverage Level	Gap Notes
BO-24	95% promotional launch readiness	P3	FR-057, FR-080	**Uncovered (current release)**	Both FRs = Won't Have; objective not achievable in committed scope

Summary: 2 objectives uncovered or weak for current release (**BO-22**, **BO-24**); 1 objective with no direct FR (**BO-22**); 17 objectives rely on derived (implicit) FR mapping not authored in source documents.

---

3. Business Objective Traceability Matrix

Primary FR paths supporting each business objective. Full FR detail in Section 5.

BO ID	Objective	Priority	Primary BP(s)	Primary FR(s)	Primary US	AC Range	Primary UR
BO-01	Single trusted inventory view	P1	BP-10	FR-023, FR-024, FR-027, FR-068	US-023, US-024, US-027, US-068	AC-023–AC-068	UR-04, UR-05, UR-12
BO-02	Inventory accuracy ≥95%	P1	BP-11, BP-13	FR-030–FR-034, FR-071	US-030–US-034, US-071	AC-030–AC-071	UR-05, UR-06, UR-09
BO-03	Standardized movement recording	P1	BP-07, BP-18, BP-25	FR-029, FR-015, FR-044, FR-060	US-029, US-015, US-044, US-060	AC-029, AC-015, AC-044, AC-060	UR-07, UR-08, UR-06
BO-04	Reduce manual reconciliation 60%	P2	BP-10, BP-29	FR-023–FR-027, FR-069	US-023–US-027, US-069	AC-023–AC-069	UR-04, UR-05, UR-17
BO-05	Order fill rate ≥92%	P2	BP-16–BP-19	FR-041–FR-045	US-041–US-045	AC-041–AC-045	UR-12, UR-04, UR-08
BO-06	Fulfillment cycle time −30%	P2	BP-18	FR-044, FR-049	US-044, US-049	AC-044, AC-049	UR-08, UR-13
BO-07	Priority SKU stockouts −50%	P2	BP-21, BP-03	FR-051, FR-008, FR-070	US-051, US-008, US-070	AC-051, AC-008, AC-070	UR-05, UR-15
BO-08	Stock cancellations −40%	P2	BP-16, BP-19	FR-041, FR-024, FR-045	US-041, US-024, US-045	AC-041, AC-024, AC-045	UR-12, UR-13
BO-09	Excess inventory −20%	P3	BP-26, BP-29	FR-070, FR-040, FR-053	US-070, US-040, US-053	AC-070, AC-040, AC-053	UR-15, UR-03
BO-10	Turnover +15%	P3	BP-29, BP-30	FR-073, FR-075	US-073, US-075	AC-073, AC-075	UR-03, UR-17
BO-11	Write-offs/shrinkage −25%	P2	BP-14, BP-15	FR-035, FR-036, FR-039, FR-011	US-035, US-036, US-039, US-011	AC-035, AC-036, AC-039, AC-011	UR-06, UR-05
BO-12	Emergency procurement −30%	P2	BP-21, BP-22	FR-051, FR-053, FR-054	US-051, US-053, US-054	AC-051, AC-053, AC-054	UR-15, UR-16

BO ID	Objective	Priority	Primary BP(s)	Primary FR(s)	Primary US	AC Range	Primary UR
BO-13	Replenishment within 2 days	P2	BP-21, BP-22	FR-051, FR-052, FR-054, FR-076	US-051, US-052, US-054, US-076	AC-051, AC-052, AC-054, AC-076	UR-15, UR-16
BO-14	Cross-location imbalance −40%	P2	BP-24–BP-26	FR-058–FR-063, FR-028	US-058–US-063, US-028	AC-058–AC-063, AC-028	UR-04, UR-10
BO-15	On-time delivery ≥90%	P2	BP-18	FR-044, FR-049, FR-041	US-044, US-049, US-041	AC-044, AC-049, AC-041	UR-08, UR-13

6. User Role Traceability Summary

Story Role → UR Catalog Mapping

Story Role (US)	UR ID	UR Name	Story Count	Notes
Inventory Controller	UR-05	Inventory Controller	18	Primary master data and accuracy owner
Operations Director / Operations Manager	UR-04	Operations Director	22	"Operations Manager" in stories maps to UR-04
Warehouse Manager	UR-06	Warehouse Manager	12	Location operations
Receiving Clerk	UR-07	Receiving Clerk	8	Inbound operations
Warehouse Staff	UR-09	Warehouse Staff	2	Put-away and counting
Warehouse Picker / Warehouse Operator	UR-08	Warehouse Picker/Packer	3	Fulfillment floor

Story Role (US)	UR ID	UR Name	Story Count	Notes
Buyer	UR-16	Buyer/Procurement Officer	6	Purchasing execution
Purchasing Manager	UR-15	Purchasing Manager	8	Procurement oversight
Sales Representative	UR-12	Sales Representative	4	Commercial availability
Customer Service Representative	UR-13	Customer Service Rep	10	Order status and returns
Regional / Store Manager	UR-10	Regional/Store Manager	1	Transfer requests
Marketing Manager	UR-14	Marketing Manager	2	Deferred (WNH)
Finance Manager	UR-17	Finance Manager/Accountant	2	Valuation and reconciliation
Internal Auditor	UR-18	Internal Auditor	4	Audit and compliance
COO	UR-02	Chief Operating Officer	1	Location performance
CEO	UR-01	Chief Executive Officer	1	Executive KPIs
System Administrator	**—**	**Not in UR catalog**	**4**	**OR-06: US-081, US-082, US-084, US-085**

7. Acceptance Criteria Coverage Summary

Metric	Value
User stories with AC sections	**90 / 90 (100%)**
Estimated total acceptance criteria	**~360** (avg. 4 categories × ~4 criteria per story)
AC ID format	AC-{US}-H/V/E/X{n}
Stories with KPI/business threshold AC	**0**
Stories with integration AC	**0**
Stories with deferred (WNH) tag on AC	**0** (recommended for US-057, US-062, US-080)
Stories with E2E cross-reference	**0**

AC Category Distribution (All Stories)

Category	Code	Purpose	Present For
Happy Path	H	Standard successful outcome	All 90 stories
Validation	V	Business rules and authorization	All 90 stories
Error	E	Failure handling	All 90 stories
Edge Cases	X	Boundaries and exceptions	All 90 stories

---

8. Recommended Remediation Actions

Priority	Action	Resolves
P1	Publish Requirements Errata reconciling Phase vs MoSCoW for FR-057, FR-062, FR-080, FR-050	OR-01–03, DUP conflicts
P1	Add explicit BO reference to every FR record	MT-01
P1	Document FR-019→FR-065 and FR-057→FR-080 supersession rules	DUP-01, DUP-02
P1	Add integration boundary FR for order intake minimum data contract	MT-06, OR-09
P2	Create Acceptance Test Plan with BO/KPI thresholds (E2E scenarios)	MT-02, MT-08
P2	Add UR-20 System Administrator to user roles catalog OR map to technical role	OR-06
P2	Tag AC-057, AC-062, AC-080 as **Deferred — Won't Have**	OR-01–03
P2	Define BO-22 success criteria outside IMS (change management plan)	OR-07, BO-22
P3	Build NFR traceability matrix (204 NFRs → BO/FR)	MT-07
P3	Add supplier master FR or document free-text supplier policy	OR-05
P3	Add product substitute master FR before FR-050 delivery	OR-04

---

9. RTM Statistics

Artifact	Total	Fully Traced	Gaps
Business Objectives	24	22 (derived FR path)	2 weak/uncovered (BO-22, BO-24)
Business Processes	32	32 (via FR)	3 partial at MVP (BP-05, BP-06, BP-31)
Functional Requirements	90	90 (→US→AC)	4 release orphans (WNH)
User Stories	90	90	4 role orphans (Sys Admin)
Acceptance Criteria	~360	~360	0 KPI; 0 integration; 0 E2E
User Roles	19	17 linked to stories	Sys Admin, External Auditor (passive)

Business Requirements Document — Independent Review Report

Document Information

Attribute	Detail
Review ID	BRD-REV-001
Document Reviewed	BRD-IMS-001 — Business Requirements Document (Version 1.0)
Review Date	July 3, 2026
Reviewer Role	Senior Business Consultant
Review Scope	Business requirements completeness, consistency, clarity, gaps, conflicts, risks, and stakeholder readiness
Review Method	Independent analysis of BRD-IMS-001 against source phase artifacts (Business Discovery, Domain Analysis, Domain Knowledge, Functional Requirements, Non-Functional Requirements, User Roles & Permissions, RTM-IMS-001)
Out of Scope for This Review	Solution redesign, technology selection, architecture, or implementation planning

Executive Summary

BRD-IMS-001 is a **well-structured consolidation** of seven completed analysis phases into a single stakeholder-facing document. It presents a credible business case, clearly bounded scope, 24 SMART objectives, 32 business processes, 90 functional requirements, 204 non-functional requirements, and supporting governance artifacts. The document is **suitable for structured stakeholder review** and represents **above-average maturity** for a mid-market distribution/retail IMS initiative.

However, the BRD is **not yet decision-ready for formal baseline approval** without resolving material consistency gaps, documenting integration boundaries, and reconciling objectives with committed release scope. Several P1 objectives and P3 KPIs are stated in the BRD but are **not fully supported** by in-scope, MVP-committed functional requirements or measurable acceptance criteria.

Overall Assessment by Dimension

Dimension	Rating	Summary
Completeness	Good (with gaps)	Core inventory lifecycle well covered; integration boundaries, reference data, and organizational enablers under-specified
Consistency	Fair	Phase tags, MoSCoW, feature catalog, and NFR targets contain internal conflicts not reflected in BRD errata

Dimension	Rating	Summary
Clarity	Good	Plain business language, logical structure, appropriate executive vs. operational layering
Ambiguities	Fair	ATP calculation, order boundary, receiving controls, and policy defaults unresolved
Missing Requirements	Moderate gap	Order intake contract, supplier master, substitute rules, UoM conversion, notification routing
Conflicting Requirements	Moderate	Release priority conflicts, put-away vs. cross-dock, safety stock vs. reservation, availability NFR math
Risks	Adequately identified	BRD Section 19 is sound; additional delivery and stakeholder risks noted below
Stakeholder Readiness	Conditional	Finance, warehouse, sales, and marketing have unresolved boundary and expectation gaps

Recommendation Summary

Approve the BRD for stakeholder review and workshop discussion — do not approve as a formal requirements baseline until a Requirements Errata is published addressing Priority 1 issues (ISS-001 through ISS-012). Estimated remediation effort: **2–3 weeks of facilitated business analysis**, not a project redesign.

Review Findings Register

The table below lists all identified issues. Each entry includes severity, recommendation, and stakeholder questions where clarification is required.

Category: Completeness

ID	Issue Found	Severity	Recommendation	Questions for Stakeholders
ISS-001	**No formal requirements traceability matrix within the BRD.** Appendix A references traceability at a summary level only. BO → FR linkage is implicit; 17 of 24 objectives rely on derived mapping not authored in functional requirement text.	**High**	Incorporate RTM-IMS-001 as a controlled BRD appendix or reference a baselined RTM as a companion artifact. Require explicit BO ID on every FR before baseline sign-off.	Does the steering committee accept derived traceability as interim, or require explicit BO tags on all 90 FRs before approval?
ISS-002	**Order fulfillment integration boundary is undefined.** FR-041–FR-049 assume orders exist externally. BRD scope excludes CRM but commits to reservation, partial fulfillment, and order status — with no minimum order data contract documented.	**Critical**	Add a business-level integration assumption or thin boundary requirement stating: order source system, minimum order/line fields, reservation trigger point, and status sync direction. Document in BRD Assumptions or new appendix.	Which system creates customer orders today? What is the minimum data the IMS must receive to reserve and fulfill? Who owns the order master record?

ID	Issue Found	Severity	Recommendation	Questions for Stakeholders
ISS-003	**Supplier reference data is referenced but not specified.** FR-013 and FR-022 reference suppliers; no requirement to maintain supplier identity, status, or lead time attributes.	**High**	Either add a minimal supplier reference data requirement or explicitly document that supplier is free-text only through Phase 2, with implications for PO tracking and performance reporting.	Will purchasing accept free-text supplier entry at MVP, or is a supplier list required before go-live?
ISS-004	**Change management and adoption enablers are under-represented.** P1 objectives BO-21 (90% adoption) and BO-22 (retire parallel manual tools) appear in the BRD but have no supporting functional requirements, acceptance criteria, or dedicated change management plan section.	**High**	Add a BRD subsection on Organizational Change Prerequisites linking BO-21/BO-22 to change management activities, compliance policy, and KPI-22 measurement — outside the IMS but required for objective achievement.	Who will enforce retirement of spreadsheets and paper logs? What consequences apply for non-compliance after month 6?
ISS-005	**NFR traceability to business objectives is absent from the BRD.** 204 NFRs are summarized in Section 15 but not mapped to BO, FR, or KPI. NFR review identified unresolved availability math conflicts and missing performance targets for bulk import and finance export.	**Medium**	Publish NFR traceability summary as companion artifact. Resolve NFR-AVL-001 vs. NFR-AVL-009 conflict before BRD baseline. Cross-reference high-risk NFRs in BRD Risks section.	Is finance export performance a month-end close requirement? What is the acceptable import duration for go-live data load?
ISS-006	**Business events catalog (52 events) not included or referenced in BRD body.** Events underpin FR triggers but are invisible to stakeholders reviewing the BRD alone.	**Low**	Add Business Events Catalog to Appendix F related documents with note that FR triggers trace to BE-xx identifiers.	—
ISS-007	**Process ownership (RACI) not documented.** 32 processes list departments involved but not accountable process owner — critical given ORC-07 (no formal inventory function today).	**High**	Add process ownership matrix as BRD appendix before operational rollout planning. Confirm Inventory Controller assignment (BA-03).	Who is the named accountable owner for each of the 32 processes at go-live? Has the Inventory Controller role been formally assigned?

Category: Consistency

ID	Issue Found	Severity	Recommendation	Questions for Stakeholders
ISS-008	**Phase tags vs. MoSCoW priority conflict.** FR-057, FR-062, FR-080 are tagged Phase 3 in functional requirements but MoSCoW = Won't Have (current release). BRD Section 14 lists them without reconciled authoritative status.	**Critical**	Publish Requirements Errata with one authoritative release column per FR. Mark FR-057, FR-062, FR-080 as Won't Have — Deferred. Remove or reframe BO-24 and KPI-25 targets for current release if those FRs remain deferred.	Does Marketing accept deferral of promotional readiness (BO-24) beyond the current program, or is this a scope exception request?
ISS-009	**BO-24 and KPI-25 appear in committed objectives while supporting FRs are Won't Have.** BRD lists BO-24 (95% promotional launch readiness by month 12) and KPI-25 (≥95% readiness) without noting dependency on deferred FR-057/FR-080.	**High**	Reclassify BO-24 and KPI-25 as **future program objectives** or elevate FR-057/FR-080 to Phase 2 scope via formal change request. Align executive summary and success metrics accordingly.	Is promotional launch readiness a committed outcome for this initiative within 12 months, or a future enhancement?
ISS-010	**MVP scope vs. in-scope feature list inconsistency.** Section 8.1 lists "visibility into inbound expected stock (open purchase orders at summary level)" as in scope, but FR-013 (PO recording) is Phase 2 only. BP-05 and BP-06 have no MVP functional support.	**High**	Clarify in MVP boundaries that inbound PO visibility is **manual or out-of-system at MVP**, with FR-013 delivering automation in Phase 2. Update Section 8.3 MVP table explicitly.	At MVP go-live, how will receiving clerks match inbound goods to expected orders if POs are not in the system?
ISS-011	**User role catalog vs. user stories inconsistency.** BRD Section 16 defines UR-01–UR-19. User stories US-081, US-082, US-084, US-085 assign **System Administrator**, which is explicitly excluded from the business role catalog.	**Medium**	Either add UR-20 System Administrator with defined business purpose or map those stories to an existing governance role with documented separation from operational duties.	Who performs user provisioning at go-live — IT, Operations, or a dedicated IMS administrator?
ISS-012	**Feature catalog naming inconsistency in BRD Appendix B.** F-20 labeled "Order Status Visibility" but includes FR-050 (substitution); F-25 labeled "Operational Dashboards" but F-26 holds KPI reporting. Feature-to-FR mapping differs from feature catalog source.	**Low**	Align Appendix B with authoritative feature catalog or cite feature catalog as separate controlled document.	—
ISS-013	**NFR availability targets contain mathematical conflict.** NFR-AVL-001 (≥99.5% uptime) vs. NFR-AVL-009 (≤3 hours downtime/month) cannot both be true at stated business hours — noted in NFR review but not reflected in BRD Section 15 summary.	**High**	Resolve before BRD baseline. Document reconciled availability standard in BRD or reference corrected NFR document version.	What is the acceptable monthly downtime budget per location during business hours?

ID	Issue Found	Severity	Recommendation	Questions for Stakeholders
ISS-014	**Functional requirement FR-075 cites BO-07 in source text; should reference BO-18** (valuation variance). Error propagates to traceability integrity.	**Low**	Correct typographical BO reference in functional requirements source; note correction in errata.	—

Category: Clarity

ID	Issue Found	Severity	Recommendation	Questions for Stakeholders
ISS-015	**"Real-time" inventory visibility stated throughout BRD without business-time definition.** Constraints (TEC-03, TEC-04) state no automated channel sync and same-day transaction processing — "real-time" may be misinterpreted as sub-second or channel-synchronized.	**Medium**	Define "real-time" in BRD glossary or Section 12: e.g., "updated upon recorded transaction completion within the same business day." Align with NFR-PERF-002 (2-second lookup target).	What maximum delay between a warehouse transaction and sales visibility is acceptable to the business?
ISS-016	**Primary locations not enumerated.** MVP, BO-01, BA-31 (≥80% volume), and TC-03 (sequential rollout) reference "primary locations" without a named list, count, or selection criteria in the BRD.	**High**	Add Primary Locations Register appendix: site name, type, go-live wave, approximate SKU count, and volume share. Required before rollout calendar approval.	Which locations are in Wave 1? How many total primary sites and by when?
ISS-017	**Approval threshold values not stated.** Business rules BR-21 and FR-037 reference adjustment approval thresholds; BRD does not state whether dollar/value thresholds are defined or pending policy decision.	**Medium**	Document that threshold values are pending COO/CFO policy sign-off, or state interim defaults. Link to FR-012 governance policies (Phase 2).	What are the adjustment and write-off approval limits by role and location?
ISS-018	**Interim finance reconciliation process not described.** BO-18, BO-20, TEC-05, and FR-089 assume manual export/reconciliation for 12 months — BRD mentions FR-089 but not the interim monthly process finance will follow.	**Medium**	Add brief description of month-end reconciliation steps (export format, frequency, owner, sign-off) in Business Processes or Assumptions.	What is the agreed interim process for ops-to-GL reconciliation until automated integration is delivered?

Category: Ambiguities

ID	Issue Found	Severity	Recommendation	Questions for Stakeholders
ISS-019	**ATP (Available-to-Promise) calculation not defined in one place.** Rules are scattered across FR-024, FR-018 (put-away), FR-025 (reservations), FR-038 (quarantine), FR-056 (safety stock), and BR-1. Sales and operations may apply different mental models.	**Critical**	Add ATP Calculation Definition appendix to BRD listing all inclusions and exclusions with business rule references. Required before sales training and UAT.	Is ATP = on-hand minus reservations minus quarantine minus unput-away received stock? Are promotional ring-fences in scope?
ISS-020	**PO mandatory vs. ad-hoc receipt exception matrix undefined.** FR-017 requires PO for supplier receipts; FR-019 allows non-PO inbound; MVP permits ad-hoc receipts. Authorization rules, reason codes, and audit treatment not specified in BRD.	**High**	Document receiving exception matrix: scenario, authorizer role, reason code, financial treatment. Resolve domain question Q-13.	Who can approve receipt without a PO? What is the monthly limit or value cap for ad-hoc receipts?
ISS-021	**Put-away vs. cross-docking not addressed.** FR-018 excludes received stock from ATP until put-away complete. Cross-dock operations (direct ship from dock) may conflict with industry practice and fulfillment speed objectives (BO-06).	**Medium**	State whether cross-docking is in scope. If yes, define when ATP becomes available for cross-dock inventory.	Does any location perform cross-dock or same-day ship from receiving without put-away?
ISS-022	**Safety stock vs. reservation interaction unclear.** FR-056 suggests safety stock protection; FR-042 allows reservation above threshold. Unclear if safety stock is a hard block or soft warning.	**Medium**	Clarify in business rules section: reservation may or may not consume below safety stock, and under what authorization.	Can orders reserve stock below safety stock level? If yes, who approves?
ISS-023	**Backorder priority rules undefined.** FR-046 references policy-driven backorder allocation; no policy content in BRD. AC-046-H2 assumes rules exist.	**Medium**	Resolve domain question Q-07 before Phase 2 FR-046 enters scope. Document default behavior if policy absent.	When multiple orders compete for limited stock, what is the allocation priority — order date, customer tier, channel?
ISS-024	**Product substitution rules undefined.** FR-050 requires approved alternates; no requirement to define substitute relationships. AC-050-V1 assumes substitute list exists.	**Medium**	Defer FR-050 explicitly to Phase 3 or add substitute master requirement before FR-050 is scheduled.	Will product substitution be used in fulfillment? If yes, who maintains the approved alternate list?
ISS-025	**Segregation of duties exception for small teams not in FR text.** FR-084 body does not describe small-team exception; acceptance criteria AC-084-V1 does. BRD Section 16 references SoD rules but not small-team policy.	**Medium**	Align FR-084 text with AC-084-V1. Document authorized SOD exception process and audit flagging in governance section.	Which locations have teams too small for full segregation? What compensating controls apply?

ID	Issue Found	Severity	Recommendation	Questions for Stakeholders
ISS-026	**Opening balance: FR-010 vs. FR-090 relationship unclear.** Both address go-live stock establishment; whether import replaces or extends manual count workflow is not stated.	**Low**	Clarify: FR-090 bulk import must still require verified count sign-off per FR-010, or define when import alone is acceptable.	Will opening balances come from physical count only, import only, or count-validated import?

Category: Missing Requirements

ID	Issue Found	Severity	Recommendation	Questions for Stakeholders
ISS-027	**Unit of measure conversion rules not specified.** Domain knowledge identifies UoM mismatch as top error source. AC-050-X2 references conversion; no FR defines conversion rules per product.	**High**	Add business requirement for UoM conversion definition per product/category, or document assumption that single UoM applies per context with manual conversion outside system.	Do stores order in units while warehouse stocks in cases? How is conversion handled today?
ISS-028	**Notification recipient and escalation rules not specified.** FR-076–FR-080 deliver alerts but not who receives them, escalation windows, or channel preferences.	**Medium**	Add lightweight requirement for alert routing configuration or document as operational procedure outside system for MVP.	Who receives low-stock alerts — buyer, purchasing manager, or both? What is the escalation if unacknowledged after 24 hours?
ISS-029	**Transfer cancellation/reversal not specified.** FR-058–FR-060 cover request through execution; no requirement for cancel-in-transit or reversal after erroneous dispatch.	**Medium**	Add business requirement or document as manual adjustment workflow via FR-035 until explicit transfer reversal is scoped.	How are in-transit transfer errors corrected today?
ISS-030	**Quarantine release/disposition workflow incomplete.** FR-038 mentions quarantine status; inspection outcomes and release-to-available path not fully specified.	**Medium**	Extend FR-038 acceptance criteria or add explicit disposition steps: inspect, release, scrap, return-to-supplier.	Who decides when quarantined stock returns to sellable inventory?
ISS-031	**Acceptance criteria do not include SMART objective thresholds.** BO-02 (≥95% accuracy), BO-05 (≥92% fill rate), BO-16 (90% self-service) absent from AC. BRD success metrics and AC operate in separate test layers.	**High**	Publish Acceptance Test Plan linking BO/KPI targets to E2E scenarios. Reference in BRD Section 20 or new appendix.	Will UAT sign-off be at story level only, or also require KPI threshold demonstration?
ISS-032	**End-to-end golden path scenarios not documented.** No cross-story acceptance path for receive → put-away → ATP → reserve → pick.	**Medium**	Create E2E scenario catalog (5–8 paths) referenced from BRD appendices.	—

Category: Conflicting Requirements

ID	Issue Found	Severity	Recommendation	Questions for Stakeholders
ISS-033	**Marketing/campaign readiness in scope vs. CRM/promotions out of scope.** Project scope excludes promotions engine; BO-24 and FR-057/080 address campaign stock readiness. Boundary is inventory-adjacent but creates scope tension.	**High**	Publish explicit boundary statement: IMS provides stock visibility for campaign SKUs; marketing owns campaign timing and promotion rules. Align BO-24 with Won't Have FR status or change scope.	Does Marketing need system-supported readiness checks in this program, or will they use reports manually?
ISS-034	**Returns in MVP vs. future enhancements list.** Section 8.4 lists "returns management" as long-term enhancement, but FR-064/FR-019 provide MVP return intake and receipt. Scope messaging is contradictory.	**Medium**	Clarify: MVP includes basic return authorization and receipt; Phase 2 adds inspection, restock/disposition workflow (FR-065/FR-066). Update Section 8.4 wording.	—
ISS-035	**Duplicate return receipt paths (FR-019 vs. FR-065).** Both specify return physical receipt at different phases; risk of double implementation if supersession not documented in BRD.	**Medium**	Document in BRD: FR-019 is MVP interim; FR-065 supersedes upon Phase 2 returns module. Single receiving workflow target state.	—
ISS-036	**Strict PO control (FR-017) vs. MVP ad-hoc receiving.** Business rule BR-7 requires PO before receipt; MVP explicitly allows ad-hoc receipts. Control objective conflicts with operational flexibility.	**High**	Resolve via exception matrix (see ISS-020). State authoritative control policy in BRD Business Rules section.	—
ISS-037	**Safety stock protection (FR-056) vs. free reservation (FR-042).** Potential conflict on whether reservations can deplete protective buffer.	**Medium**	Clarify interaction in stock policy section (see ISS-022).	—

Category: Risks (Not Adequately Reflected in BRD Section 19)

ID	Issue Found	Severity	Recommendation	Questions for Stakeholders
ISS-038	**Baseline KPI data is estimated, not validated.** All current-state values in Section 20 are marked estimated; BA-45 requires pre-go-live baseline collection. Investment ROI case (KPI-28) cannot be proven without validated baseline.	**High**	Add explicit BRD risk: "Baseline unvalidated — objective measurement may be challenged." Mandate baseline collection before go-live per success metrics protocol.	Has baseline data collection started? Who owns it and by what date?

ID	Issue Found	Severity	Recommendation	Questions for Stakeholders
ISS-039	**Fixed budget (BC-01) vs. 90 FR + 204 NFR scope.** Material scope with 6-month MVP deadline and no new headcount (BC-02) creates delivery compression risk not quantified in BRD risks.	**High**	Steering committee should confirm MVP cut line is MoSCoW Must Have only (55 FRs). Add risk of partial rollout leaving locations on mixed processes.	If budget or timeline is fixed, which P1 objectives are non-negotiable vs. negotiable?
ISS-040	**Channel overselling risk rated Medium in BRD; likely High for B2C/multi-channel.** TEC-04 defers channel integration 12 months; BA-23 assumes no partner feed pressure — may be optimistic.	**Medium**	Reassess likelihood for organizations with e-commerce or marketplace presence. Document manual sync procedure in assumptions.	Do any sales channels require stock accuracy better than daily manual update?
ISS-041	**Inventory Controller single point of failure.** UR-05 owns master data, counts, policies, and accuracy — one role spans 18+ user stories. ORC-07 notes function may not exist today.	**High**	Confirm role assignment and backup coverage before go-live. Add to critical assumptions validation schedule.	Who covers Inventory Controller duties during leave or turnover?
ISS-042	**18 unresolved domain clarification questions** carried from domain analysis and requirements quality review into FR text. Ambiguity inherits into delivery and UAT disputes.	**High**	Schedule requirements workshop; publish decision log. Block Phase 2 FR development until Q-07, Q-08, Q-13, Q-25 resolved.	Can steering committee allocate 2–3 workshops to resolve blocking clarification questions?

Category: Stakeholder Concerns

ID	Issue Found	Stakeholder(s)	Severity	Recommendation	Questions for Stakeholders
ISS-043	**Finance expects valuation alignment (BO-18, BO-20) but manual reconciliation is interim for 12 months.** CFO may expect automated GL sync based on executive summary language.	CFO, Finance Manager	**High**	Set explicit expectation in stakeholder communication: Phase 2 FR-089; interim manual process with defined variance tolerance and close timeline.	Does CFO accept ≤5% valuation variance at month 6 with manual reconciliation, targeting ≤2% only after Phase 2?
ISS-044	**Sales expects self-service ATP (BO-16) but channel feeds remain manual (TEC-04).** Sales may conflate internal ATP access with customer-facing channel accuracy.	Sales Manager, Sales Rep	**High**	Clarify BO-16 applies to internal sales inquiry only; B2B/B2C channel accuracy is a separate manual process until integration program.	Will sales use IMS directly or through existing CRM/order tool?

ID	Issue Found	Stakeholder(s)	Severity	Recommendation	Questions for Stakeholders
ISS-045	**Warehouse concerns: put-away overhead and transaction recording burden.** BC-02 prohibits new headcount; FR-018 adds put-away step; BO-03 mandates 100% recording. Floor resistance risk (ORC-03).	Warehouse Manager, Receiving Clerk, Picker	**High**	Ensure change management budget (BC-04) is protected. Confirm process simplification goal in communications. Address in training plan.	Has Operations Director committed to enforcing recording compliance from day one?
ISS-046	**Purchasing expects PO workflow (BP-05) but MVP delivers alerts only.** Reactive buyers may not receive expected replenishment automation at go-live.	Purchasing Manager, Buyer	**Medium**	Set Phase 2 expectation for FR-013/054. Document MVP workaround: alerts trigger manual PO in existing procurement process.	Is alert-only replenishment acceptable for the first 6 months?
ISS-047	**Marketing expects launch readiness (BO-24) but FR-057/080 are Won't Have.** Marketing Manager in stakeholder map depends on campaign readiness capability.	Marketing Manager	**High**	Align expectations per ISS-009. Offer interim manual readiness checklist using FR-068/070 reports until FR-057 delivered.	Will Marketing accept manual stock readiness review using standard reports for planned campaigns?
ISS-048	**Internal Audit expects 100% audit trail (BO-19) at month 6 but SOD exceptions may apply for small locations.** Auditor may challenge compensating controls.	Internal Auditor, External Auditor	**Medium**	Engage Internal Auditor in SOD exception design before go-live. Document in FR-084 and SoD rules.	Will Internal Auditor accept documented SOD exceptions with compensating controls at small sites?
ISS-049	**Regional/Store Managers have minimal FR coverage (one primary story US-058).** Store-level stock visibility and floor replenishment pain (domain MP-07) largely unaddressed at MVP.	Regional/Store Manager	**Medium**	Confirm store locations in MVP scope. If yes, validate that warehouse-centric FR set meets store manager needs or document gaps.	Are retail stores in Wave 1? Do store managers need direct IMS access or receive transfers only?
ISS-050	**IT/System Administrator role ambiguity.** User provisioning stories exist; internal IT capacity limited (ORC-04). Unclear operating model for ongoing admin.	System Administrator, IT	**Medium**	Define IMS administration operating model: central IT vs. delegated ops admin. Add to stakeholder sign-off.	Who provisions users, manages roles, and handles access requests post-go-live?

Summary by Severity

Severity	Count	Decision Implication
Critical	4	Must resolve before BRD baseline approval (ISS-002, ISS-008, ISS-019, plus ISS-008/009 pair)
High	24	Should resolve before sprint planning or steering committee sign-off
Medium	19	Resolve during discovery workshops or Phase 2 planning
Low	3	Correct in errata; non-blocking

Strengths Worth Preserving

The review identified significant strengths that should not be lost during remediation:

1. **Coherent business narrative** — Problem statement, vision, objectives, and scope tell a consistent story aligned with stakeholder pain points.
2. **Comprehensive operational coverage** — 32 processes and 90 functional requirements cover the core inventory lifecycle credibly for a distribution/retail operator.
3. **Strong governance intent** — Business rules, SoD rules, RBAC, and audit requirements reflect mature control thinking.
4. **Phased realism** — MVP boundaries, postponed features, and scope decision principles demonstrate disciplined product thinking.
5. **Measurable ambition** — 24 SMART objectives and 28 KPIs provide accountability framework once baselines are validated.
6. **Appropriate scope exclusions** — ERP, CRM, manufacturing, and regulatory modules correctly deferred.
7. **Risk awareness** — Section 19 addresses adoption, data quality, and organizational prerequisites honestly.

Consolidated Questions for Stakeholder Workshop

The following questions should be addressed in a single facilitated session with Project Sponsor, Product Owner, COO, CFO, Operations Director, Inventory Controller (or designate), Sales Manager, Purchasing Manager, Finance Manager, and Internal Auditor:

Scope and Release Boundaries

1. Which locations are in Wave 1, and what percentage of inventory volume do they represent?
2. Is BO-24 (promotional launch readiness) a committed outcome for this program within 12 months?
3. What is the authoritative order source system, and what minimum data must the IMS receive?
4. At MVP, is inbound PO visibility manual, or must FR-013 be pulled into MVP scope?

Policy and Business Rules

5. What is the authoritative ATP calculation including all exclusions?
6. Who can authorize receipt without a PO, and what are the limits?
7. What are adjustment and write-off approval thresholds by role?

8. Can reservations consume below safety stock, and under what approval?
9. What is the backorder allocation priority when stock is insufficient?
10. Does cross-docking occur at any location, and how should ATP behave?

Organizational Readiness

11. Has the Inventory Controller role been formally assigned (BA-03)?
12. Who enforces retirement of parallel manual tracking tools (BO-22)?
13. Who performs system administration and user provisioning post-go-live?
14. What compensating controls apply where full segregation of duties is not feasible?
15. Has baseline KPI data collection started, and who owns it?

Finance and Commercial Expectations

16. Does CFO accept manual reconciliation with ≤5% variance at month 6?
17. Does Sales understand BO-16 is internal self-service only, not channel sync?
18. Is alert-only replenishment acceptable to Purchasing for the first 6 months?
19. Will Marketing accept manual readiness review using standard reports until FR-057 is delivered?

Review Conclusion

BRD-IMS-001 demonstrates **strong business analysis discipline** and successfully consolidates a large requirements corpus into a readable stakeholder document. The initiative's business case is compelling, and the core MVP focus on visibility, accuracy, fulfillment, and accountability is correctly prioritized.

The document falls short of **formal baseline readiness** due to:

- Unresolved **release priority conflicts** (objectives vs. Won't Have requirements)
- Missing **integration and ATP policy definitions** critical to sales and fulfillment
- **Implicit traceability** between objectives and requirements
- **Organizational prerequisites** (Inventory Controller, change enforcement) assumed but not contractually secured in the BRD

Final Recommendation

Action	Owner	Target
Conduct stakeholder workshop using consolidated questions above	Project Sponsor / Business Analyst	Within 2 weeks
Publish Requirements Errata (Phase/MoSCoW/BO alignment)	Product Owner	Before baseline review
Add ATP Definition and Integration Boundary appendices	Business Analyst	Before baseline review
Publish Primary Locations Register and Process RACI	Operations Director	Before rollout planning
Resolve NFR-AVL conflict and reference corrected NFR version	Product Owner / Architect (business sign-off)	Before UAT planning

Action	Owner	Target
Incorporate RTM-IMS-001 as controlled companion artifact	Business Analyst	With baseline package
Re-submit BRD for baseline approval	Project Sponsor	After Priority 1 issues closed

Review verdict: Conditionally acceptable for stakeholder review — not approved as requirements baseline until Priority 1 issues (ISS-002, ISS-008, ISS-009, ISS-019) and associated stakeholder questions are resolved.

End of Review Report

Review ID: BRD-REV-001 | July 3, 2026

Business Requirements Document — Approval Checklist

Meeting Information

Field	Detail
Document Under Review	BRD-IMS-001 — Business Requirements Document (Inventory Management System)
Review Type	Stakeholder Review / Baseline Approval
Meeting Date	_____
Meeting Chair	_____
Facilitator / PM	_____
BRD Version	☐ 1.0 ☐ Other: _____
Companion Artifacts	RTM-IMS-001, BRD-REV-001 (Review Report)

Attendees

Role	Name	Present	Sign-off Required
Project Sponsor		☐	☐
Chief Executive Officer		☐	☐
Chief Operating Officer		☐	☐
Chief Financial Officer		☐	☐
Product Owner		☐	☐
Operations Director		☐	☐
Inventory Controller (or designate)		☐	☐
Senior Business Analyst		☐	☐
Purchasing Manager		☐	☐
Sales Manager		☐	☐
Finance Manager		☐	☐
Internal Auditor		☐	☐
Other: _____		☐	☐

How to Use This Checklist

1. **Before the meeting:** PM distributes BRD, RTM, and review report at least **5 business days** in advance.
2. **During the meeting:** Walk through each section in order. Mark **Pass**, **Fail**, or **N/A**. Record notes and action owners for any Fail.
3. **Decision rule:** Baseline approval requires **all Critical items (marked ★)** to Pass with no open Critical actions.
4. **After the meeting:** PM logs outcomes, assigns actions with due dates, and schedules re-review if needed.

Legend

Symbol	Meaning
★	Critical — must Pass for baseline approval
○	Important — should Pass; exception requires Sponsor approval
—	Standard — document or confirm

Status	Definition
Pass	Requirement met; no material gap
Fail	Gap identified; action required before approval
N/A	Not applicable to this initiative
Deferred	Accepted for post-approval resolution with documented owner and date

---

1. Section Completeness

Verify all required BRD sections are present, current, and internally consistent.

#	Check Item	Priority	Pass	Fail	N/A	Notes / Action Owner
1.1	★ Document Information complete (ID, version, date, owner, scope statement)	Critical	☐	☐	☐	
1.2	★ Revision History reflects current version and change summary	Critical	☐	☐	☐	
1.3	★ Executive Summary states business need, deliverables, and investment rationale	Critical	☐	☐	☐	
1.4	Business Background includes company context and current-state summary	Standard	☐	☐	☐	
1.5	★ Business Problem Statement lists critical and high-impact problems	Critical	☐	☐	☐	
1.6	Business Vision covers short-term (12–18 months) and long-term (3–5 years)	Standard	☐	☐	☐	
1.7	★ Business Objectives (BO-01–BO-24) with targets, priorities, and deadlines	Critical	☐	☐	☐	

#	Check Item	Priority	Pass	Fail	N/A	Notes / Action Owner
1.8	★ Project Scope — In Scope section complete and aligned to objectives	Critical	☐	☐	☐	
1.9	★ Project Scope — Out of Scope section complete and unambiguous	Critical	☐	☐	☐	
1.10	★ MVP Scope (Phase 1) clearly defined with boundaries	Critical	☐	☐	☐	
1.11	Future Enhancements and postponed features documented	Standard	☐	☐	☐	
1.12	Stakeholders section includes roles, influence matrix, and dependencies	Standard	☐	☐	☐	
1.13	Business Processes (BP-01–BP-32) indexed with domains and priorities	Standard	☐	☐	☐	
1.14	Actors and User Roles (UR-01–UR-19) defined with responsibilities	Standard	☐	☐	☐	
1.15	Domain Knowledge and core concepts summarized	Standard	☐	☐	☐	
1.16	★ Business Rules (BR-1–BR-32) listed with business meaning	Critical	☐	☐	☐	
1.17	★ Functional Requirements (FR-001–FR-090) summarized by domain	Critical	☐	☐	☐	
1.18	Non-Functional Requirements summarized by category (204 NFRs)	Standard	☐	☐	☐	
1.19	User Roles and Permissions (RBAC, SoD) summarized	Standard	☐	☐	☐	
1.20	Assumptions (BA-01–BA-46) categorized with validation approach	Standard	☐	☐	☐	
1.21	Constraints (BC, TC, LC, OC, ORC, TEC) documented	Standard	☐	☐	☐	
1.22	★ Risks section includes likelihood, impact, and mitigation	Critical	☐	☐	☐	
1.23	★ Success Metrics / KPIs (KPI-01–KPI-28) with baselines and targets	Critical	☐	☐	☐	
1.24	Glossary includes essential inventory terms	Standard	☐	☐	☐	
1.25	Appendices include traceability summary, features, pain points, related docs	Standard	☐	☐	☐	
1.26	○ Approval Record page present with signature blocks	Important	☐	☐	☐	
1.27	○ RTM-IMS-001 referenced or attached as controlled companion artifact	Important	☐	☐	☐	
1.28	No technical design, architecture, API, or database content in BRD body	Standard	☐	☐	☐	

Section Completeness Result: ☐ Pass ☐ Fail ☐ Pass with documented exceptions

Fail items requiring action	Owner	Due Date

2. Requirement Completeness

Verify requirements are sufficient, traceable, and testable for the committed release.

#	Check Item	Priority	Pass	Fail	N/A	Notes / Action Owner
2.1	★ All 32 business processes (BP-01–BP-32) supported by ≥1 functional requirement	Critical	☐	☐	☐	
2.2	★ All 90 functional requirements (FR-001–FR-090) have corresponding user stories	Critical	☐	☐	☐	
2.3	★ All 90 user stories have acceptance criteria defined	Critical	☐	☐	☐	
2.4	○ BO → FR traceability documented (RTM or explicit BO tags on FRs)	Important	☐	☐	☐	
2.5	○ All P1 objectives (BO-01, 02, 03, 16, 19, 21, 22) mapped to supporting FRs	Important	☐	☐	☐	
2.6	★ MVP Must Have FRs identified and agreed (MoSCoW / Phase 1 alignment)	Critical	☐	☐	☐	
2.7	○ Phase tags and MoSCoW priorities reconciled — no conflicting release status	Important	☐	☐	☐	
2.8	○ Won't Have requirements (FR-057, FR-062, FR-080) clearly marked deferred	Important	☐	☐	☐	
2.9	★ Critical pain points (PP-01–PP-05) addressed by in-scope requirements	Critical	☐	☐	☐	
2.10	○ Order / fulfillment integration boundary documented (order source, minimum data)	Important	☐	☐	☐	
2.11	○ Supplier reference approach defined (master data or free-text policy)	Important	☐	☐	☐	
2.12	○ ATP (Available-to-Promise) calculation defined in one authoritative place	Important	☐	☐	☐	
2.13	○ Receiving exception matrix defined (PO required vs. ad-hoc receipt)	Important	☐	☐	☐	
2.14	○ Approval thresholds documented for adjustments and write-offs	Important	☐	☐	☐	
2.15	○ Primary Locations Register attached or referenced (Wave 1 sites named)	Important	☐	☐	☐	
2.16	○ Acceptance Test Plan or E2E scenarios linked to BO/KPI targets	Important	☐	☐	☐	
2.17	○ Supersession rules documented (FR-019→FR-065; FR-057→FR-080)	Important	☐	☐	☐	
2.18	NFR conflicts resolved (e.g., availability uptime vs. downtime budget)	Standard	☐	☐	☐	

#	Check Item	Priority	Pass	Fail	N/A	Notes / Action Owner
2.19	Performance NFRs cover bulk import (FR-090) and finance export (TEC-05)	Standard	☐	☐	☐	
2.20	No orphan requirements without business justification or release slot	Standard	☐	☐	☐	

Requirement Completeness Result: ☐ Pass ☐ Fail ☐ Pass with documented exceptions

Fail items requiring action	Owner	Due Date

---

3. Stakeholder Validation

Confirm affected parties have reviewed, provided input, and accept their responsibilities.

#	Check Item	Priority	Pass	Fail	N/A	Notes / Action Owner
3.1	★ Project Sponsor has reviewed and accepts scope, objectives, and constraints	Critical	☐	☐	☐	
3.2	★ Product Owner confirms FR priorities align with business value and MVP	Critical	☐	☐	☐	
3.3	★ COO / Operations Director confirms processes and rollout approach	Critical	☐	☐	☐	
3.4	○ CFO / Finance Manager accepts interim reconciliation approach and BO-18/20 targets	Important	☐	☐	☐	
3.5	○ Inventory Controller role assigned or designate confirmed (BA-03)	Important	☐	☐	☐	
3.6	○ Warehouse Manager confirms receiving, put-away, pick/ship workflows are achievable	Important	☐	☐	☐	
3.7	○ Purchasing Manager accepts MVP replenishment scope (alerts vs. full PO workflow)	Important	☐	☐	☐	
3.8	○ Sales Manager accepts BO-16 scope (internal ATP only; not channel sync at MVP)	Important	☐	☐	☐	
3.9	○ Customer Service confirms order status and availability requirements meet needs	Important	☐	☐	☐	
3.10	○ Marketing Manager expectations aligned on BO-24 / promotional readiness deferral	Important	☐	☐	☐	
3.11	○ Internal Auditor reviewed SoD rules and audit trail requirements (BO-19)	Important	☐	☐	☐	
3.12	○ IT / System Administrator operating model defined for user provisioning	Important	☐	☐	☐	

#	Check Item	Priority	Pass	Fail	N/A	Notes / Action Owner
3.13	○ Regional / Store Manager needs addressed if retail stores in Wave 1	Important	☐	☐	☐	
3.14	Stakeholder concerns from BRD-REV-001 reviewed and disposition recorded	Standard	☐	☐	☐	
3.15	Change management owner identified for BO-21 (adoption) and BO-22 (retire manual tools)	Standard	☐	☐	☐	
3.16	SME time commitment (20%) confirmed by department heads (BA-44)	Standard	☐	☐	☐	

Stakeholder Validation Result: ☐ Pass ☐ Fail ☐ Pass with documented exceptions

Stakeholder	Concern Raised	Disposition	Owner	Due Date
		☐ Accepted ☐ Deferred ☐ Rejected		
		☐ Accepted ☐ Deferred ☐ Rejected		
		☐ Accepted ☐ Deferred ☐ Rejected		

4. Scope Validation

Confirm in-scope, out-of-scope, MVP, and phasing decisions are agreed and achievable.

#	Check Item	Priority	Pass	Fail	N/A	Notes / Action Owner
4.1	★ In-scope capabilities map to documented business problems and objectives	Critical	☐	☐	☐	
4.2	★ Out-of-scope items explicitly exclude ERP, CRM, manufacturing, regulatory modules	Critical	☐	☐	☐	
4.3	★ MVP scope is achievable within 6-month deadline (TC-02) and fixed budget (BC-01)	Critical	☐	☐	☐	
4.4	○ MVP scope does not include Phase 2 items unless formally pulled in via change request	Important	☐	☐	☐	
4.5	○ In-scope list consistent with MVP table (e.g., PO visibility at MVP vs. Phase 2)	Important	☐	☐	☐	
4.6	○ Primary locations represent ≥80% of inventory volume (BA-31)	Important	☐	☐	☐	
4.7	○ Sequential rollout calendar agreed with peak-season blackout periods (TC-04)	Important	☐	☐	☐	
4.8	○ No operational shutdown required at go-live (OC-01) — cutover approach accepted	Important	☐	☐	☐	
4.9	○ Manual process bridges documented where automation deferred (finance export, channel sync)	Important	☐	☐	☐	

#	Check Item	Priority	Pass	Fail	N/A	Notes / Action Owner
4.10	○ Postponed features list agreed — no stakeholder expects deferred items in MVP	Important	☐	☐	☐	
4.11	Scope creep items identified in meeting logged to change control backlog	Standard	☐	☐	☐	
4.12	○ BO-24 and KPI-25 status aligned with Won't Have FR-057/FR-080 decision	Important	☐	☐	☐	
4.13	Returns scope clarified: MVP basic intake vs. Phase 2 full workflow	Standard	☐	☐	☐	
4.14	Integration scope boundary with existing finance, sales, and HR systems documented	Standard	☐	☐	☐	

Scope Validation Result: ☐ Pass ☐ Fail ☐ Pass with documented exceptions

Scope change requests raised	Requestor	Disposition	CR #
		☐ In ☐ Out ☐ Deferred	
		☐ In ☐ Out ☐ Deferred	

---

5. Business Rule Validation

Confirm industry and organizational rules are defined, consistent, and enforceable.

#	Check Item	Priority	Pass	Fail	N/A	Notes / Action Owner
5.1	★ BR-1: Sell/promise only against ATP — agreed by Sales and Operations	Critical	☐	☐	☐	
5.2	★ BR-2: Reserve stock at order confirmation — reservation trigger point agreed	Critical	☐	☐	☐	
5.3	★ BR-3: Do not ship without pick verification — warehouse workflow accepted	Critical	☐	☐	☐	
5.4	★ BR-20: Every adjustment requires reason code — reason code list defined	Critical	☐	☐	☐	
5.5	○ BR-19: Counter cannot approve own count adjustments — SoD accepted	Important	☐	☐	☐	
5.6	○ BR-21: Adjustments above threshold require independent approval — thresholds set	Important	☐	☐	☐	
5.7	○ BR-4/6/7: Receiving verification, discrepancy documentation, PO reference — policy agreed	Important	☐	☐	☐	
5.8	○ BR-5: Received stock not available until put-away — cross-dock exception resolved	Important	☐	☐	☐	

#	Check Item	Priority	Pass	Fail	N/A	Notes / Action Owner
5.9	○ BR-9/10: Reorder trigger and safety stock rules — thresholds for A-class SKUs planned	Important	☐	☐	☐	
5.10	○ BR-11/12: Network check before purchase; transfer source minimum — agreed	Important	☐	☐	☐	
5.11	○ BR-13: Quarantined stock excluded from ATP — quarantine workflow defined	Important	☐	☐	☐	
5.12	○ BR-18: Blind cycle counts — count program approach accepted by warehouse	Important	☐	☐	☐	
5.13	○ BR-28: Backorder requires customer acknowledgment — CS policy aligned	Important	☐	☐	☐	
5.14	○ SOD-001–SOD-020 separation-of-duties rules reviewed by Internal Auditor	Important	☐	☐	☐	
5.15	○ Small-team SOD exceptions documented with compensating controls (FR-084)	Important	☐	☐	☐	
5.16	Business rules consistent with functional requirements — no contradictions	Standard	☐	☐	☐	
5.17	Policies requiring COO/CFO sign-off identified and scheduled	Standard	☐	☐	☐	

Business Rule Validation Result: ☐ Pass ☐ Fail ☐ Pass with documented exceptions

Rule / Policy gap	Decision needed from	Target date

6. Risk Review

Confirm risks are identified, owned, and acceptable to proceed.

#	Check Item	Priority	Pass	Fail	N/A	Notes / Action Owner
6.1	★ Critical assumptions (BA-01, 03, 14, 16, 24, 29, 30, 31, 34, 35) validation plan agreed	Critical	☐	☐	☐	
6.2	★ Blocking constraints acknowledged (BC-01, TC-02, OC-01, ORC-07)	Critical	☐	☐	☐	
6.3	★ Adoption risk (BO-21, BO-22, ORC-03) — change management plan referenced	Critical	☐	☐	☐	
6.4	○ Data quality risks (catalog, opening balances, baseline KPIs) — owners assigned	Important	☐	☐	☐	
6.5	○ Go-live service level risk — hypercare and rollback plan referenced	Important	☐	☐	☐	

#	Check Item	Priority	Pass	Fail	N/A	Notes / Action Owner
6.6	○ Channel overselling risk (TEC-04) — manual sync procedure accepted	Important	☐	☐	☐	
6.7	○ Finance reconciliation delay risk (TEC-05) — interim process agreed	Important	☐	☐	☐	
6.8	○ Budget overrun / scope reduction risk — Sponsor acknowledges trade-offs	Important	☐	☐	☐	
6.9	○ Inventory Controller single-point-of-failure — backup coverage planned	Important	☐	☐	☐	
6.10	○ 18 domain clarification questions — blocking items scheduled for resolution	Important	☐	☐	☐	
6.11	Residual risks acceptable to Project Sponsor for baseline approval	Standard	☐	☐	☐	
6.12	Risk register updated with new items from this review meeting	Standard	☐	☐	☐	

Risk Review Result: ☐ Pass ☐ Fail ☐ Pass with documented exceptions

Risk	Likelihood	Impact	Mitigation Owner	Accepted by Sponsor
	☐ L ☐ M ☐ H	☐ L ☐ M ☐ H ☐ C		☐
	☐ L ☐ M ☐ H	☐ L ☐ M ☐ H ☐ C		☐

---

7. Approval Criteria

Formal decision gates for BRD baseline approval.

7.1 Mandatory Criteria (All Must Be Met)

#	Criterion	Met?
A1	★ All **Critical** checklist items (★) marked **Pass** or **Deferred** with Sponsor-approved action plan	☐
A2	★ No unresolved **Critical** open actions from BRD-REV-001 (ISS-002, ISS-008, ISS-009, ISS-019)	☐
A3	★ Scope, MVP, and out-of-scope boundaries explicitly agreed by Sponsor and Product Owner	☐
A4	★ P1 business objectives have documented FR support or accepted organizational enabler plan	☐
A5	★ Required signatories present or represented with delegated authority	☐
A6	★ Requirements Errata published OR reconciliation workshop scheduled within 2 weeks with fixed date	☐
A7	Baseline KPI collection plan initiated (BA-45) with named owner and start date	☐
A8	Primary Locations Register committed or Wave 1 list agreed in meeting minutes	☐

7.2 Conditional Approval Criteria

May approve baseline with documented conditions if A1–A8 met and only Important (○) items remain open.

#	Criterion	Met?
C1	All Important (○) Fail items have assigned owner, due date, and Sponsor acknowledgment	☐
C2	Maximum **5** Important open actions at time of approval	☐
C3	Re-review date scheduled for open Important items: _____	☐
C4	No stakeholder dissent recorded without documented disposition	☐

7.3 Rejection Criteria (Do Not Approve)

Any of the following triggers **Reject** or **Defer approval**:

- ☐ Critical scope disagreement between Sponsor, COO, and Product Owner
- ☐ P1 objective (BO-01, 02, 03, 16, 19, 21, 22) lacks FR support and no enabler plan
- ☐ Inventory Controller role unassigned with no interim owner (BA-03)
- ☐ MVP scope exceeds 6-month / budget constraints without formal change request
- ☐ Finance or Internal Audit raises unresolved Critical control concern
- ☐ Order integration boundary undefined and fulfillment FRs in MVP scope

---

8. Meeting Decision

Overall Checklist Summary

Section	Result
1. Section Completeness	☐ Pass ☐ Fail ☐ Exceptions
2. Requirement Completeness	☐ Pass ☐ Fail ☐ Exceptions
3. Stakeholder Validation	☐ Pass ☐ Fail ☐ Exceptions
4. Scope Validation	☐ Pass ☐ Fail ☐ Exceptions
5. Business Rule Validation	☐ Pass ☐ Fail ☐ Exceptions
6. Risk Review	☐ Pass ☐ Fail ☐ Exceptions

Approval Decision

Select **one**:

Decision	Selected
☐ **Approved** — BRD-IMS-001 approved as requirements baseline (version: _____)	☐
☐ **Approved with Conditions** — Baseline approved subject to action plan below	☐
☐ **Deferred** — Reconvene after open actions closed (target date: _____)	☐

Decision	Selected
☐ **Rejected** — Material gaps require BRD revision before re-submission	☐

Conditions of Approval (if applicable)

#	Condition	Owner	Due Date	Status
1				☐ Open ☐ Closed
2				☐ Open ☐ Closed
3				☐ Open ☐ Closed
